

MECCANICA  
felTRINA S.R.L.

MECHANICAL MACHINING AND MANUFACTURING

## QUALITY AND PRECISION SINCE 1973

**Meccanica Feltrina**, based in the industrial area of **Villapaiera**, in Feltre (BL), is a family-run company managed by the **Sartor family** since its foundation in 1973.

From the very beginning, the company has stood out for its strong connection to the local area and its ability to respond promptly and precisely to market demands, offering high-quality solutions in the field of **mechanical processing and constructions**.

## CONTINUOUS GROWTH AND INNOVATION

Over the decades, thanks to **constant commitment** and a strong focus on employee training, Meccanica Feltrina has developed a **highly skilled team**, enabling the company to embark on a path of continuous growth.

This expansion has allowed for ongoing improvements in its offerings, **refining production** processes to meet the **specific needs of customers**, with a constant focus on **technological innovation** and the quality of the final product.

## OUR FACILITIES

Today, the company has **over 20 employees**, distributed across **three separate facilities**, each specializing in a different type of **machining process**.

This **diversified structure** allows **Meccanica Feltrina** to respond **flexibly and efficiently** to a wide range of requests, further strengthening its position in the market.

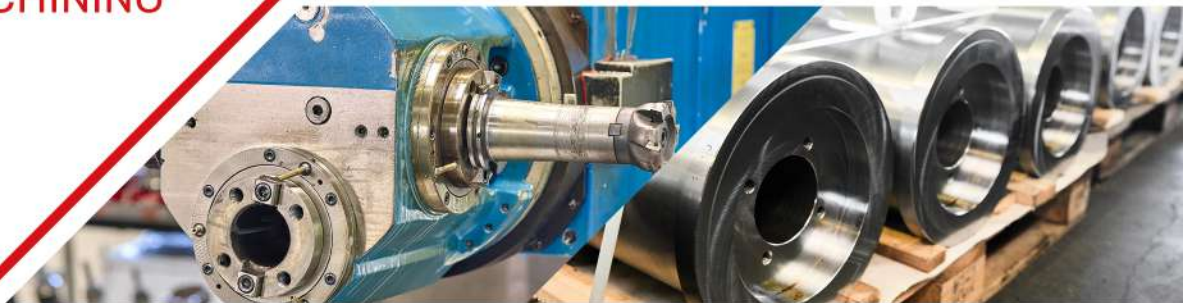

## A CONTINUOUS EVOLUTION

Initially focused on **contract mechanical machining** and the construction of metal structures, the company has evolved over time, **expanding** its expertise and gaining extensive experience in various industrial sectors.

The **professionalism** and expertise acquired over the years have enabled Meccanica Feltrina to successfully tackle market challenges, turning its **adaptability** and **versatility** into a true competitive advantage.

## SERVICES & MACHINING

**The goal is to make  
universality and versatility  
its key strengths.**

## PRECISION MECHANICAL MACHINING

Over the years, Meccanica Feltrina has continuously evolved, responding promptly and flexibly to the ever-changing demands of the industrial sector. The experience gained and the professional expertise acquired over time, combined with continuous technical training and up-to-date knowledge of its personnel, have enabled the company to successfully meet the increasingly diverse and complex market demands.

Thanks to this, Meccanica Feltrina has made versatility and adaptability two of its key strengths, reinforcing its reputation as a reliable and innovative partner. The company performs mechanical machining, including: Milling of parts up to 6 meters in length and 2.5 meters in height; Turning up to Ø1000 mm for 300 mm in length; Shaft machining up to Ø550 mm with a length of 3 meters.

## CONSTRUCTION AND ASSEMBLY OF COMPLETE MACHINERY

Meccanica Feltrina specializes in the construction and assembly of complete machinery, offering customized solutions tailored to various industrial sectors. Each customer project is carefully managed through every stage, from procurement and production to final assembly, ensuring a high-quality, ready-to-use finished product.

Thanks to its experience and process flexibility, the company can meet specific technical requirements and manufacture complex, reliable, and durable machinery. Meccanica Feltrina is the ideal partner for those seeking expertise, precision, and comprehensive support throughout every phase of construction and assembly.

## PROCESSED METAL STRUCTURES

We are capable of performing certified welding, as our operators hold the necessary **qualification licenses**.

The company follows **certified WPQR** procedures and is able to provide non-destructive testing, including **visual and dimensional inspections, liquid penetrant testing, magnetic particle testing, and ultrasonic testing**.

## TUBE MANUFACTURING

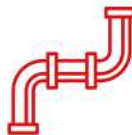

Meccanica Feltrina specializes in the **manufacturing of high-pressure piping and welded tubes**, ensuring high standards of safety and reliability, ideal for complex industrial applications in the naval, railway, and hydroelectric sectors.
