INNBIOTEC
— PHARMA —
WELLBEING SOLUTIONS

ABOUT US

The company was founded in Florence as a spin-off of the Department of Molecular Biology of the University of Florence, to exploit technologies developed over 15 years of research, with the aim of dedicating itself to the research and production of supplements, nutraceuticals and dermocosmetics.

Always aiming at constant technological innovation, Innbiotec Pharma boasts in its formulations the presence of numerous patents and registered trademarks Such as the patented ingredient Renovase®, a conjugate of bioavailable glutathione with fatty acids, which promotes the renewal of skin cells, with antioxidant action.

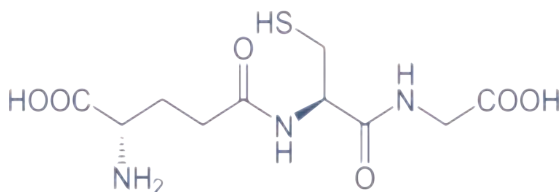

Innbiotec Pharma

was founded in the context of the valorisation of research projects on innovative molecules such as **Glutathione** and **Oleuropein**.

All our production is Made In Italy from formulation to marketing.

OUR STRENGTH

Glutathione (GSH)

The King of Antioxidants

What is that?

It consists of a combination of three amino acids: glutamic acid, cysteine and glycine.

Glutathione has a strong antioxidant action due to the presence of cysteine in its molecule, our main defence against oxidative stress. It is also essential for removing harmful substances such as toxins, environmental pollutants, mercury and other heavy metals from the body. It also performs an essential function for the proper functioning of our immune system.

The body produces Glutathione, but various conditions, including poor diet, pollution, toxins, drugs, stress, trauma and ageing, reduce Glutathione levels in the body.

OUR STRENGTH

Oleuropein

A valuable polyphenol from *Olea europaea*

What is that?

Polyphenols constitute a heterogeneous group of natural substances that are particularly well known for their positive effect on human health (not surprisingly, they are sometimes referred to as Vitamin P). Polyphenols are organic compounds produced by plants, of which the flavonoids represent the most abundant class. Based on their structure, they can be schematically divided into three different classes: that of simple phenols, tannins and flavonoids.

Oleuropein is a polyphenol found in the leaves and drupes of the olive tree. Experimental research and clinical trials conducted over the last 20 years have shown that this polyphenol has numerous beneficial properties, which are useful in the active prevention and treatment of major degenerative diseases such as diabetes mellitus, neoplasms and certain neurodegenerations.

RENOVASE®

**AN EXCLUSIVE FORMULA
TO COMBAT THE SIGNS OF AGEING**

RENOVASE COMBINES GLUTATHIONE (GSH) AND ESSENTIAL ACID (EFA) WHICH, DUE TO ITS LIPOPHILIC NATURE, CAN CROSS CELL MEMBRANES. WITHIN CELLS, ENZYMES HYDROLYSE RENOVASE RELEASING GSH AND EFA, RESTORING THE CORRECT ANTIOXIDANT DEFENCES, WHICH IS WHY GSH IS SAID TO BE BIOAVAILABLE.

CLINICAL TESTS CONDUCTED TO EVALUATE THE ANTI-WRINKLE AND MOISTURISING PROPERTIES OF COSMETIC PRODUCTS CONTAINING RENOVASE HAVE SHOWN IMMEDIATE WEEK OF APPLYING THE PRODUCT TWICE A DAY. SCIENTIFIC STUDIES HAVE DEMONSTRATED ITS PROTECTIVE EFFECT AGAINST THE AGEING PROCESS CAUSED BY THE SUN'S ULTRAVIOLET RAYS AND A WHITENING ACTION ON THE SKIN FOR A VISIBLE REDUCTION IN THE SIGNS OF AGEING.

BYE BYE DOL

IDEAL FOR SOOTHING MUSCLE TENSION

OINTMENT WITH CBD

Ointment based on cbd (cannabidiol) ideal for soothing muscle tension, also in athletes. The formulation contains arnica montana, mint arvensis and other natural substances commonly used to relieve pain. Thc and thca absent.

THC free

CANNABIDIOL CBD IS A CHEMICAL COMPOUND DISCOVERED IN DRIED CANNABIS SATIVA. IT IS ONE OF 142 PHYTOCANNABINOIDS IDENTIFIED IN CANNABIS SATIVA PLANTS.

CBD IS AN ACTIVE INGREDIENT EXTRACTED FROM CANNABIS FLOWERS, WHICH HAS BENEFICIAL EFFECTS ON THE SKIN AND IS THEREFORE WIDELY USED IN THE PRODUCTION OF COSMETICS. CBD DOES NOT HAVE THE PSYCHOACTIVITY OF THC, THE MAIN PSYCHOTROPIC AGENT IN CANNABIS.

AFTER MANY YEARS OF MISINFORMATION, CANNABIS HAS BEEN RE-EVALUATED, MAINLY BECAUSE OF THE HEALING PROPERTIES OF ONE OF ITS ACTIVE INGREDIENTS: CBD, SHORT FOR CANNABIDIOL. IT IS PRECISELY THE VERSATILITY OF THE PHYTOCANNABINOID THAT HAS MADE IT A SUCCESS IN COSMETICS.

THE COSMETICS INDUSTRY, IN FACT, USES CBD AND NOT THC, WHICH HAS PSYCHOTROPIC PROPERTIES.

IT IS A TOTALLY NATURAL ELEMENT, EXTRACTED FROM THE INFLORESCENCES OF CANNABIS SATIVA. CBD COSMETICS ARE EXTREMELY EFFECTIVE WITHOUT THE USE OF CHEMICALS.

ACTIVE INGREDIENTS
