Made in Italy

Premium Quality since 1982

Marzoarreda is an artisan workshop that has been designing and manufacturing artistic products and custom-made furniture since 1982, strictly by hand and in Italy.

Born in Novoli, a small community in the vicinity of Lecce, Marzoarreda produces, in the first 20 years, tailor-made furnishings of high-end cabinet-making in a classic and contemporary style.

In a world where cultural distances are narrowing until everyone is in possession of the same objects, Marzoarreda combines the production of furniture on commission with unconventional artistic objects, rejecting the logic of standardization and flattening of taste.

The essence of Made in Italy

Designed for those who love beauty, uniqueness and Made in Italy, our works are born from strictly artisanal processing techniques.

We pass on the knowledge, care and manufacturing typical of the Italian cabinet-making tradition, but we give each product an international flavor.

This allows us to create works with a high quality content, some of which patented, intended for exclusive and elegant environments.

We package unique works, branded and marked with a numerical progression that identifies each individual product.

Small imperfections, hollows and ripples of the surface are deliberately present, constituting a specific characteristic of the manual manufacture of our works. Quality and workmanship are, among our values, an obsession. If a product does not live up to our standards, we destroy it before it leaves our laboratory.

Branded quality

For 40 years, we have been working with the sole objective of ensuring the quality of our works and offering our customers seriousness and attention to detail.

For this reason, at the end of the process, we affix our seal, branding each product and guaranteeing sustainable and ingenious production of our master carpenters.

Our patents

The uniqueness of our processes and the quality of the products are certified by the Italian Patent and Trademark Office of the Ministry of Economic Development.

Our patents are tangible demonstration of the commitment and willingness to invest in Research and Development with the aim of continuing to design unique and unprecedented aesthetic and functional solutions.

Authentic beauty

Each product has a certificate of authenticity which certifies the ownership, uniqueness and originality of the work.

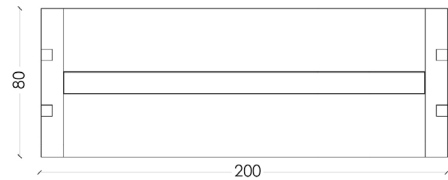

The certificate shows the customer's name, the progressive purchase number of the product and the details of the patent, representing a guarantee of care and commitment for our partners and customers.

Vintage

Coffee table

Branch sections of Schinus molle
drowned in a casting of
pigmented epoxy resin.

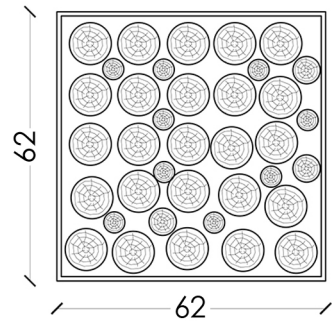

Vintage collection

Protecting the wood from the signs of time, wear and decay.

Immersed in a cast of epoxy resin that fills the gaps until the individual pieces are part of the same unicum, the sections of the branches appear natural, in their naked beauty, for a unique and eternal piece.

The products of the Vintage collection are composed of solid wood tops and log washers embedded in a cast of pigmented epoxy resin. On request, different essences and colors are available for the resin pigmentation.

The collection consists of unique pieces branded, numbered and accompanied by a certificate of authenticity.

Rustic elegance

Stalattiti

Door

Natural tulipier

Stalattiti

Sliding door in solid tulipwood, standard and made-to-measure dimensions, consisting of single or double-sided door covered with overlapping wedge-shaped bands.

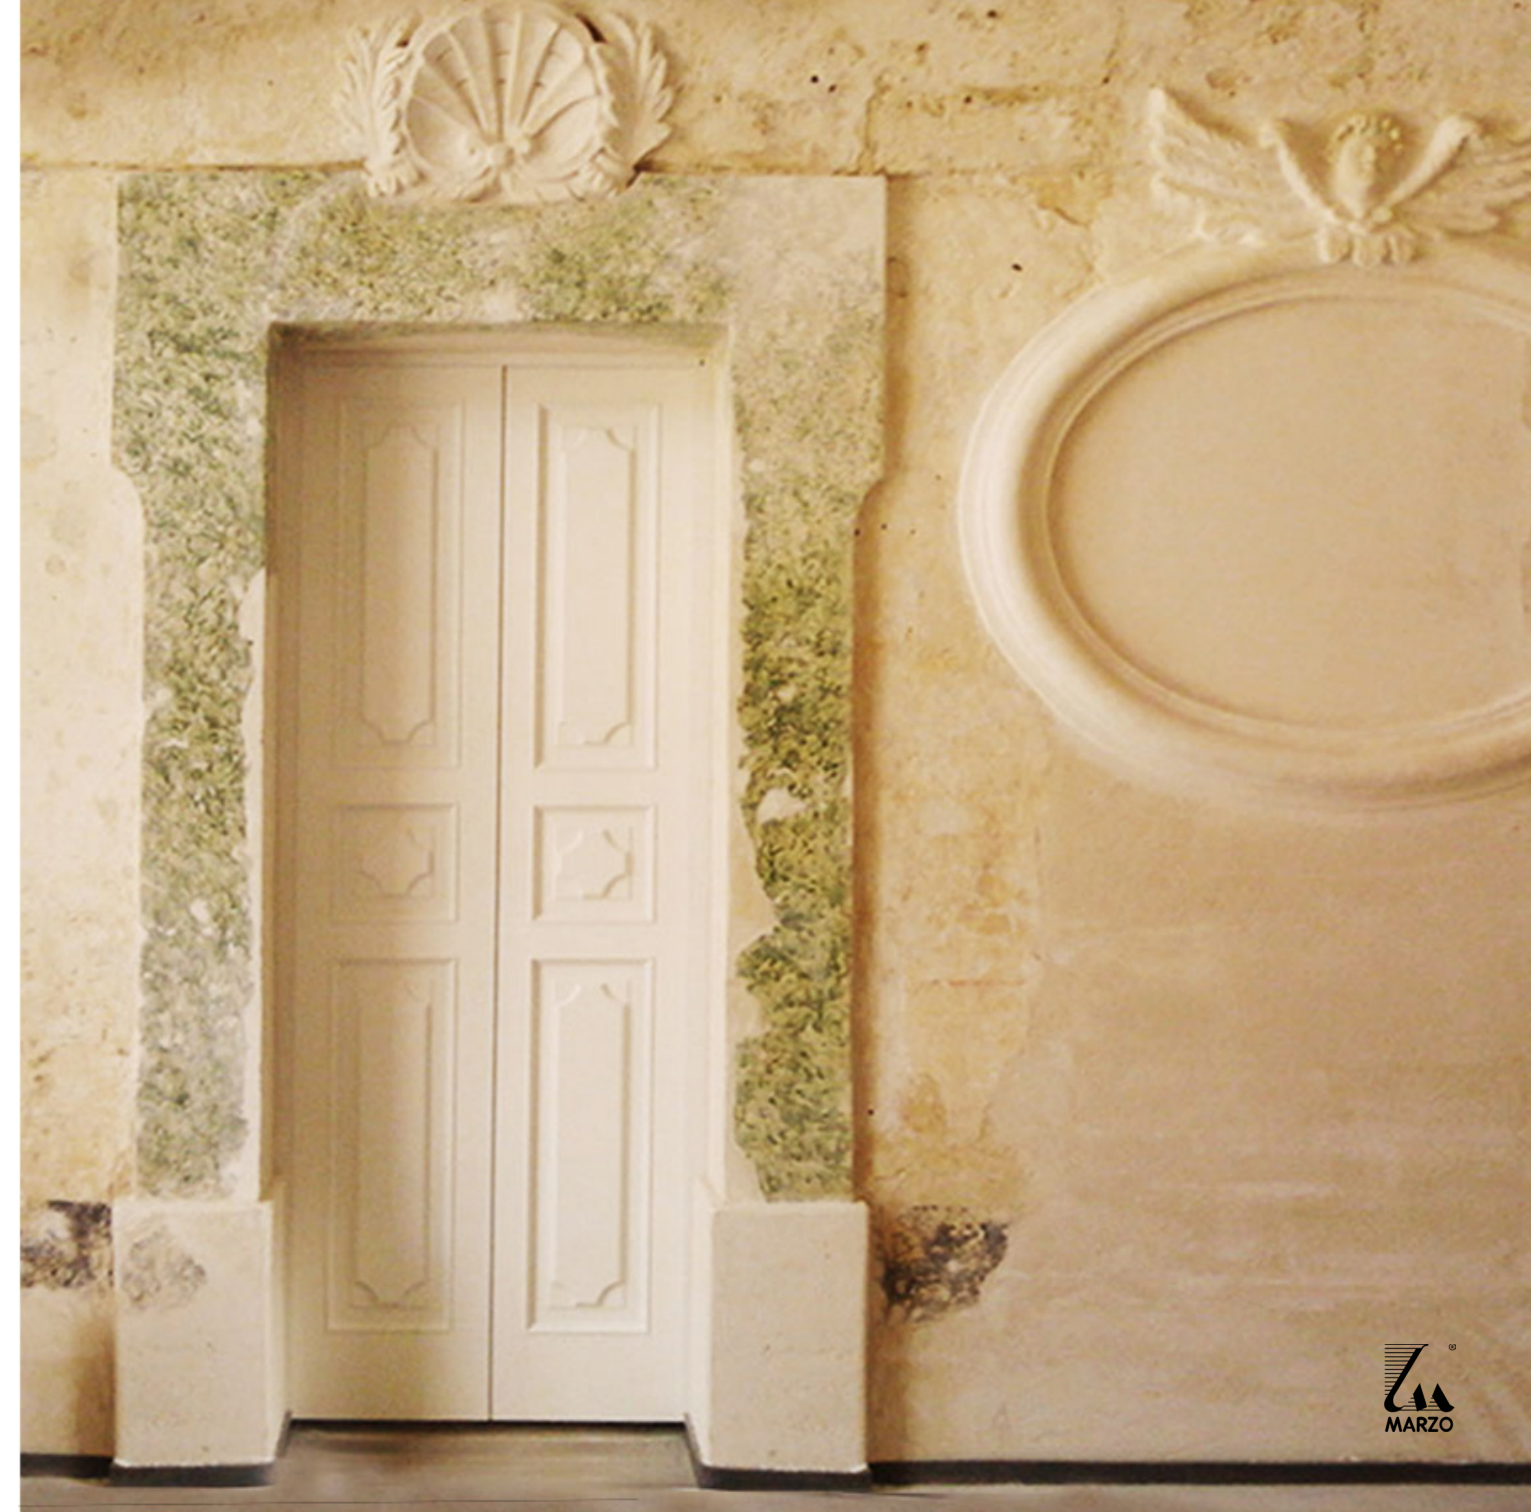

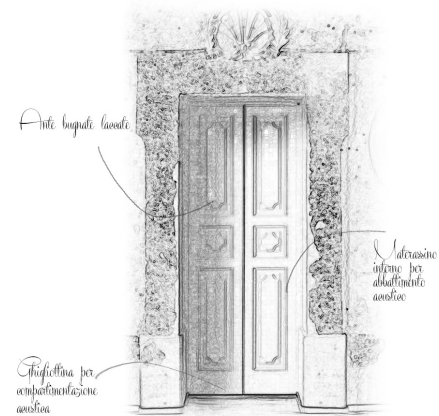

The Stalattiti door is characterized by a rustic and industrial flavor and is in fact designed for restoration or building recovery contexts.

These features do not exclude its use in contemporary environments, where the Stalattiti door fits in with elegance and strong impact.

The processing of this wooden sliding door is done entirely by hand, enhancing the artisan flavor and the aesthetic value of the environment in which it is placed.

Optic

OP ART (Optical Art) is an artistic research aimed at creating, in objects, optical motion illusions which involve the observer.

Starting from the intuitions of Futurism, Dadaism and Constructivism, it experiments every possibility of movement and inspires the realization of ever changing furniture objects, based on a rigorous definition of the operating method.

MARZOARREDA brings this field of research into the space of everyday life, producing tables, coffee tables, floors, boiserie and accessories.

Unique handmade pieces, enriched with elaborate design inserts and textures.

Rover

Tray

Rover

Modern trays in natural or stained oak wood, handmade, suitable for classic or modern environments.

The ROVER tray is produced in three sizes and can be used in a versatile way, to take tea or coffee, to place keys or the remote control, to place cold food because it is treated with certified paints for food. It can also be made to measure.

Handcrafted in our laboratory in Italy.

Double

Tray

Aladin

Box

Aladin

This box was created to keep your thoughts, desires and belongings.

Entirely handmade in our laboratory in Italy,

the Aladin box can also be used as a tray or valet tray.

Sushi plates

Materials

Lime wood

Iroko

Snake sushi-set

Sushi set, Snake model, consisting of a central tray in solid wood pieces 23 × 35 cm, 2 or 4 plates 20 × 20 cm in solid lime wood.

The tray is made by manually assembling pieces of iroko and lime, patiently selected, to form a continuously moving image.

Each element of the set is made using artisanal techniques and is characterized by a food-grade paint finish, washable, non-toxic and certified. The central tray and the plates also have a lower taper that gives lightness to the entire set.

Chopsticks are not included.
