SERVICES

DESIGN

Using the AutoCad and 3D SolidWorks computer system, we are able to carry out design, both as a whole and in detail, construction and assembly drawings, piping sketches, and the execution of surveys for the drafting of diagrams and process plans.

WORKINGS

- Assembly of prefabricated piping and installation of instrumentation and piping on complete skids
- The construction of industrial equipment such as atmospheric and pressure tanks, reactors with heating coils and half-pipes, heat exchangers, sheet metal ducts, hoods, hoppers, silos, complete skids.
- Assembly of metal structures such as prefabricated structures, stairs, gangways, industrial sheds, pipe supports, lattice structures, chimneys, pipe-racks and bridges.

PRE-FABRICATION ACTIVITIES IN OUR WORKSHOP

Our workshop, covering a total of 1,900 m², manufactures carbon and stainless steel equipment, tested according to 23/97 EC PED and EN 3834 certified for welding.

ON-SITE ASSEMBLY ACTIVITIES

In addition to workshop production, Cosmir carries out on-site assembly of metal structures, equipment and piping.

We also handle assembly, testing, commissioning and disassembly of plant and equipment.

SERVICES

PLANT MAINTENANCE

We carry out plant and mechanical maintenance, both on a one-off basis and with scheduled contracts, on plant equipment, gas/fluid lines and related instrumentation, mechanical equipment and special machinery, valves, pumps, mixers, motors, gearboxes and more

CERTIFICATES

Cosmir performs checks and tests on materials and manufactured products at every stage, guaranteeing quality according to UNI EN ISO 9001:2015 (cert. CR 542Q/002). We are certified BS OHSAS 45001:2018 (cert. CR-1289S/001) for safety and as a Processing Centre (cert. N°1978/12) for the production of metal structures.

In addition, we are certified EN 1090-1:2009+A1:2011 (cert. 1301-CPR-1049) for factory production control.

HUMAN RESOURCES

From the very beginning, we have chosen to employ only highly specialised personnel, supported during peak periods by qualified professionals with flexible but guaranteed contracts.

Currently, our workforce numbers 60 employees.

WORKING ABROAD

PT EVOTY - Subang Plant (Indonesia)

Type of work performed: 1st, 2nd and 3rd Lot - Installation of metal support structures and conveyor belts for the motorbike tyre production plant, including the design of the structures, any mechanical assemblies and electro-instrumental systems.

Supply of 40 m3 carbon steel raw material storage tanks.

Year: 2016-2017

Total contract value: € 1,000,000.00.

TENARIS UK - Aberdeen Plant (Scotland)

Type of work performed: Design, construction and assembly of automated mechanical steelwork complete with piping for compressed air system for handling pipes up to 24' diameter for the new Dopeless project and design, construction and assembly of an air treatment system for the painting machines of the Dopeless 2 and Dopeless 4 sections.

Years: 2015-2021

Total contract value: € 1,120,000.00

TENARIS SPII - Cilegon Plant (Indonesia)

Type of work performed: prefabrication of a methane and oxygen piping complex required for revamping the heat treatment furnaces at the Cilegon plant. Assembly of all necessary components for valves, gas trains, safety valves, various instruments and connections.

Year: 2019

Total contract value: € 420,000.00

COIM ASIA PACIFIC - Jurong Island Plant (Singapore)

Type of work performed: Detailed design of the entire plant to be built, preparation of 440 sketches, supply of materials, prefabrication of piping and on-site assembly for the construction of the new polyurethane adhesive production plant. Design, construction and on-site assembly of piping skids for the distribution of all process and service fluids of the plant.

Year: 2020-2022

Total contract value: € 2,400,000.00.

PT BOZZETTO - Bandung Plant (Indonesia)

Type of work performed: executive design of the metal structures, storage tanks and piping for the nerosulphur production plant. Supply of materials, prefabrication of the metal structures of the storage tanks and piping of various sizes and characteristics, in carbon steel and stainless steel. Assembly of the storage tanks, the reactor complete with mixer and the equipment making up the plant. Transport and complete assembly of everything built by us and supplied by others at the Bandung plant.

Year: 2022-2023

Total contract value: 700,000.00 €.
