Rose Armoniche

Donabios

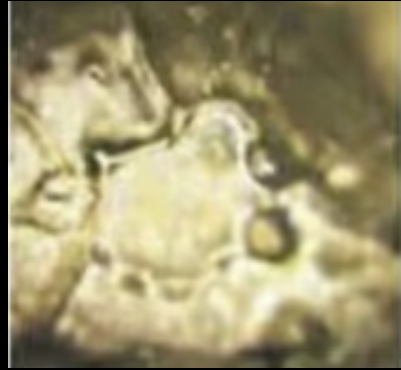

Roses, their blooming, and their fragrance have always fascinated us, evoking admiration and curiosity. Over time, we began fermenting roses, giving life to a line of natural cosmetics made from fermented and fresh roses. Our rose plants are irrigated with harmonized water from resonant systems, which imbues our products with high value. Following irrigation with harmonized water, the harmonious roses are harvested and their petals are carefully separated. Each rose is gently petaled to be used either fresh or dried. The drying process can be done manually or through cold drying in a machine that preserves the roses' properties intact. This is followed by transformation into a natural and regenerative line of harmonious rose cosmetics.

Harmonized Water

Following studies and in-depth research on the value of water and its infinite properties, I focused on the memory of water. In particular, I followed the research of the scientist Masaru Emoto, who photographed thousands of water crystals, revealing astonishing discoveries.

You make me feel
bad, I'll kill you

Thanks

Frequency and Water

Discoveries about water and frequencies reveal how vibrations can influence and enhance our lives and well-being.

Cymatics

Cymatics reveals how sound vibrations can create shapes and structures in water, unveiling the hidden harmony in nature.

Experiments by Masaru Emoto (Japanese Researcher)

The experiments conducted by Masaru Emoto have demonstrated how words and emotions can influence the structure of water molecules, revealing the power of vibrations.

Lysate (fermentation)

A natural enzymatic fermentation process that enhances the properties of our ingredients, improving their effectiveness.

Extraction

A gentle method that preserves the integrity and potency of natural active ingredients.

Lysate

A unique process that enhances natural properties, making the ingredients more bioavailable and effective.

The Benefits of Lysate

- **Greater ingredient effectiveness:** Fermentation makes ingredients more concentrated and bioactive, ensuring better results compared to non-fermented formulations.
- **High skin tolerance:** Fermented ingredients become less irritating and more suitable even for sensitive skin, minimizing the risk of allergic reactions.
- **Strengthening of the skin microbiome:** Fermentation enriches products with natural probiotics, supporting the balance of the skin microbiome and contributing to its protection and hydration.
- **Enhanced antioxidant action:** Fermented products contain more antioxidants, protecting the skin from damage caused by free radicals and premature aging.
- **Cell regeneration:** Thanks to the enzymes obtained through the fermentation process, lysate products stimulate skin cell regeneration, improving appearance and texture.

Natural Fertilizers

The rose garden is fertilized with naturally fermented fertilizers, chicken manure, and wood shavings.

Harmonized water creates a strong synergy with the high-quality fertilizer used.

Rose Harvesting

The main rose harvest takes place in April and May; however, as it is a repeat-blooming rose garden, roses are harvested until the first frosts appear. The roses are exclusively hand-harvested to avoid damaging the delicate petals and to preserve their properties intact. After the harvest, the petals are separated, a labor-intensive and delicate process. This is followed by the phases of processing in a specialized laboratory.

Rose Processing

The de-petaled roses can undergo a cold drying process or can be processed fresh in the laboratory.

In the laboratory, the process can follow a natural fermentation method based on ancient procedures. At the end of this process, natural cosmetic products are created, with various uses.

The Importance of Applying Natural-Origin Cosmetics to Our Skin

Healing and protecting our skin through the active ingredients of flowers and plants enhances its appearance, achieving long-lasting and effective results with a positive impact on the environment, which should always be protected.

Born from a passion for and observation of nature, coupled with an interest in organic cosmetics with high active ingredients, a natural skincare line based on harmonious roses was created. The harmonious rose, like most roses, contains anti-aging, moisturizing, revitalizing, and antibacterial substances.

Our cosmetic line focuses on nourishing the skin from the inside out with products specifically designed for each skin type. Each of our cosmetic products is thoughtfully crafted with love, passion, and research.

This project, conceived for the well-being of both the body and the planet, has attracted and continues to attract the interest of many scholars and researchers. It is an ongoing research study, and it will lead to a constantly evolving skincare line.

Face Cream

WITH ROSE EXTRACT

Highly moisturizing and emollient due to the presence of rose extract calendula oil and sweet almond oil. The formula is completed with Lysed Rose Water that enhances these attributes

GOLD LINE

Rose Gel FERMENTED

It consists of Fermented Lysate Rose Water with antioxidant activity. It keeps the skin smooth and velvety. It is mainly used for facial cleansing but can also be used in place of a serum or cream

Face Scrub Gel

WITH FERMENTED ROSE

Contains bits of fermented rose, lysates, and plant extracts that enable a gentle yet deep cleansing of the facial skin. Removes dead skin cells and gives the skin a healthy, radiant appearance

Toothpaste

WITH ROSE AND BAKING SODA

Baking soda and carbonate provide an effective cleaning and polishing action on teeth. Sage, cloves, and mint offer cleansing, supportive, antibacterial, and aromatic properties, while horsetail, rich in silica, enhances the action of pure silica present in the formula, helping to achieve clean and shiny teeth.

Face & Body Soap TONING

The uniqueness of this rose-based product lies in its triple function: it cleanses, tones, and hydrates

The Precious Cap Cover

Each product is accompanied by a precious cap cover made with dried harmonious roses. It serves as a pendant to wear, bringing grace, harmony, and elegance.
