

ANTI-VIBRATION FEET

Our anti-vibration feet from the “Sucon” and “Surmac” series are adjustable, available in T and S types, and are specifically used for:

- ☐ Prevent the transmission of vibrations from the machine to the ground
- ☐ Level support machinery

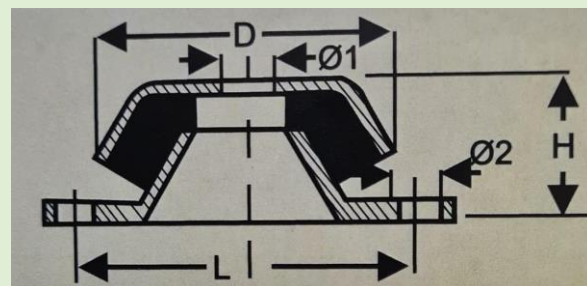

"GT" SERIES SUCTION CUPS

Our suction cups from the "GT" series are used for various applications, particularly for:

- ☐ Glass lifting;
- ☐ Marble lifting;
- ☐ Iron plate lifting;
- ☐ Lifting of any other product with a smooth surface.

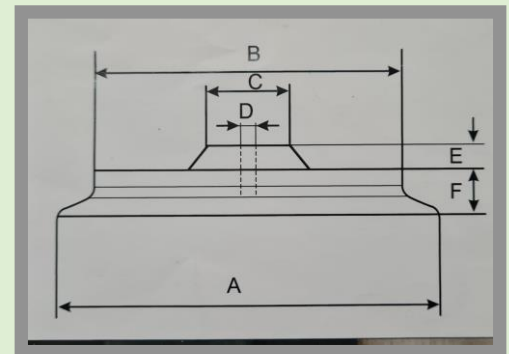

Our Anti-Vibration Feet “Sucon T” SERIES are adjustable, available in various sizes, with or without housing rings, featuring the following specific characteristics (data referring to Shore 45 rubber):

Tipo	D mm	H mm	L mm	Ø1 mm	Ø2 mm	LOAD kg	Hz MAX	Hz MIN	Y
T1	48	23	68	8,2	6,2	100	25	10	2,7
T2	62	30	85	10,2	8,2	200	20	8	3,8
T3	92	45	110	16,2	10,2	300	20	7,5	4,6
T4	120	50	160	24,2	16,2	600	20	6,5	6
T5	160	60	200	30,3	16,2	1200	20	7,5	4,4
T6	150	51,5	132X 132	M16	12,5	400	20	8,8	3,2
T7	177	63	150X 150	M20	13	850	20	6	3,5

Our high-quality suction cups from the "GT" series are available in aluminum and galvanized steel versions, with or without hubs, and are specifically used for:

- Glass lifting;
- Sheet metal;
- Marble lifting;
- Iron plate lifting;
- Lifting of any other product with a smooth surface.

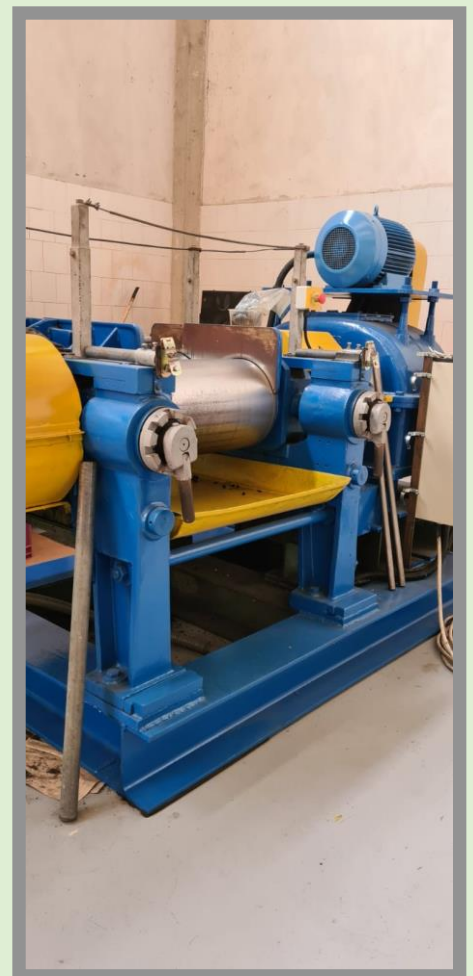

Tipo	A (mm)	B (mm)	C (mm)	D (mm)	E (mm)	F (mm)	CARICO kg

Our machinery fleet includes presses suitable for injection and compression molding with surfaces up to 1200x1200 and a maximum tonnage of 400. Additionally, we have a mixer capable of blending any type of rubber and hardness.

Our machines are capable of molding products in:

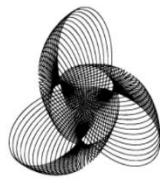

- Oil-resistant rubber;
- Natural rubber;
- Stain-resistant rubber;
- Viton;
- Silicone;
- Expanded polyurethane.

In addition to our core products, which position us as a leader in this sector, we also manufacture, upon customer request, other high-quality specific products for various strategic industries, such as:

- Transportation of products on industrial lines;
- Automotive and agricultural vehicles;
- Railway, tramway, and naval transport;
- Anti-seismic construction;
- Hydraulics.
