Who we are

Our Company IVAB was created in 1990 by Freddi brothers in Casto, in the province of Brescia. It has always been specialized in Bathroom Furnishing. Its story started with Accessories and has expanded later, in order to offer a more and more wide experience. Passion and love for beauty push us to create each product according to the highest quality standards in order to satisfy every kind of need. That's why our company, with over 30 years experience, does not forget its origins and promotes Made in Italy products in order to create pure design items.

The ideas

We are inspired by the beauty and the culture of our territory. We try to understand the emerging trends in order to design bathroom furniture which may be able to evaluate our space and may give it a touch of modernity and functionality.

Projects

Inspiration creates new and original elements to fit different ambiances. Our technicians work together with our Designers in order to develop efficient solutions suitable for any situation. The development of a project starts only after a deep market research and after the evaluation of its aesthetic impact

Creation

Conceiving and realizing an original idea is an important step of our work, making us able to produce a nice, functional and long-lasting product. That means for us to be able to select carefully raw materials, to choose the best way of managing the production process and finally to choose the best way of assembling each part, so that final product may match our high quality standards. As last step of the development process, we test the resistance to the weight and to the external agents (water and detergents) and finally we test even drawer guides and doors hinges and much more else.

Thank you to chose Ivab Group
