SPHERA DOCCE & ACCESSORI

Founded in 1999 as a manufacturer of Shower Rails and Flexible Hoses, Sphera is now a company offering a complete range of Showers and Taps Accessories

Quality, Efficiency, Service, Reliability, Flexibility

are the basis of our daily work

INSPIRATION

WELLNESS

EMOTION

HEADQUARTERS

Sphera's headquarters is strategically located which allows to supply national and international customers with great speed.

We are located in the province of Novara not many kilometres from the International Airport of Milan Malpensa and the port of Genoa.

In our plant of **11,000 square metres**, we have **3 warehouses** that allow us to respond with speed and flexibility to the needs of our customers by handling large volumes of goods on a daily basis.

We manage a subdivision of products according to the different requests of the customer (by piece, by carton, by pallet).

We have structured picking processes in our warehouses, kitting, packing, co-packing in order to have maximum reactivity in the management of requests.

STRENGTHS

QUALITY

EFFICIENCY

SERVICE

FLEXIBILITY

RELIABILITY

Quality

- Use of ACS-certified hoses inside the shower panels
- Easy disassembly system of the cartridges by always accessing the shower panels from outside
- Installation of made-in-Italy cartridges inside the thermostatics
- Air and water tests on all sensitive mechanisms
- Easy Fix system for simplified assembly on the most complex products
- Protection inside all finishing supports to prevent damage of painted surfaces
- Inspectability of all shower heads

Efficiency

- 11,000 m2 of warehouses with goods in stock ready for sale
- Stock availability of products in Matt Black, Matt White and Brushed Nickel finishes
- Maximum automation in the management of the order from its arrival to its fulfilment

Service

- In-house Powder Coating Plant
- Customised laser marking and engraving
- Customised packaging
- Supply of customised hoses
- Dedicated packaging lines for emergencies
- Customer service answering in 5 languages

Flexibility

- Possibility of combining the various products in the catalogue to meet all target price requirements
- Company structured to quickly manage not only standard product sales but also customisations

Reliability

- Customer satisfaction is the company's focus
- Internal organisation structured to respond quickly and clearly to every customer need

STORAGE AND SERVICES

The company's hallmark is the large number of products available in **STOCK** and the ability to handle orders with maximum speed and efficiency of the order, from its confirmation to dispatch. Consolidated internal procedures for storage in dedicated areas and product traceability, speed up packaging operations as much as possible. We are organised to manage a capillary distribution of goods both nationally and internationally. Our organisational flexibility allows us to manage shipments both small parcels and pallets with considerable volumes of goods. With dedicated packaging lines we are able material in a maximum of **2/4 working days** from receipt of order. receipt of the order. Characterising our flexibility, the countless **customisations** in terms of both product and packaging.

Our organisation allows us to manage the order with maximum efficiency from order confirmation to dispatch.

POWDER COATING PLANT

Since last May, Sphera has had a modern department of powder coating of a high quality standard.

Powder coating is a coating technique that offers many advantages over traditional liquid painting methods. Here are some of the main benefits

Durability: powder coating creates a very durable layer of resistant coating, which is less susceptible to splintering, scratches and wear. This increases the longevity of painted products.

Resistance to weathering: powder coatings are particularly effective in resisting adverse weather conditions such as humidity, UV rays and chemicals, maintaining their integrity over time.

POWDER COATING PLANT

Uniformity of coating: thanks to the electrostatic application, the powder coating ensures uniform distribution of the coating on complex and detailed surfaces reducing the risk of drips or imperfections.

Environmental efficiency: it is considered more environmentally friendly than traditional methods, as it does not contain toxic solvents and produces less waste

Safety: there is no need to handle dangerous solvents as well as greater processing speed, which allows us to respond quickly to our customers' needs.

STAINLESS STEEL

With respect for the environment and a focus on safeguarding the health of end users, Sphera has developed over the years a wide range of products in 316 Stainless Steel; a noble material that guarantees long life and maximum resistance to corrosion by external agents as well as being the ecological and recyclable material par excellence. In the pages of this catalogue you will find a section dedicated articles produced with this material so that you can create a bathroom with complete respect for the environment.

SUSTAINABILITY

Sphera is a green company oriented to the environment. Renewable energy is the future of our planet so Sphera Headquarters has a system of photovoltaic panels that fully take solar energy, with a greatly reduced environmental impact.

Furthermore, Sphera is continuously researching and developing products that reduce the amount of water during their use.

Great and continuous attention is also paid to packaging in terms of both recyclability and dimensions in order to limit unnecessary waste. This logistical model also helps to reduce the energy costs of transport and related CO2 emissions into the environment.
