

AMBOS ,
A GREAT STORY OF PASSION,
WORK AND INNOVATION

Ambos has been producing accessories for the inside of wardrobes and walk-in closets for more than 45 years. Specialized for the upper part of the wardrobe with a range of Lifts that covers the different load capacity needs from 10 up to 20 kgs; it also offers a complete range for the lower part, with Trouser Racks, Clothes Racks, Accessory racks, both frontal and under – shelves.

Wardrobe: upper part

For the upper part of the wardrobe available in both grey and black colours

- LIFT 300 load capacity 10 kgs
- LIFT 700 load capacity 15 kgs
- SUPERLIFT load capacity 20 kgs
- LIFT 360° load capacity 25 kgs in 2 tubes

LIFT 300

is the most essential model of the series. This does not mean that it gives up functionality and performance, being able to lift 10 kg of hanging clothes.

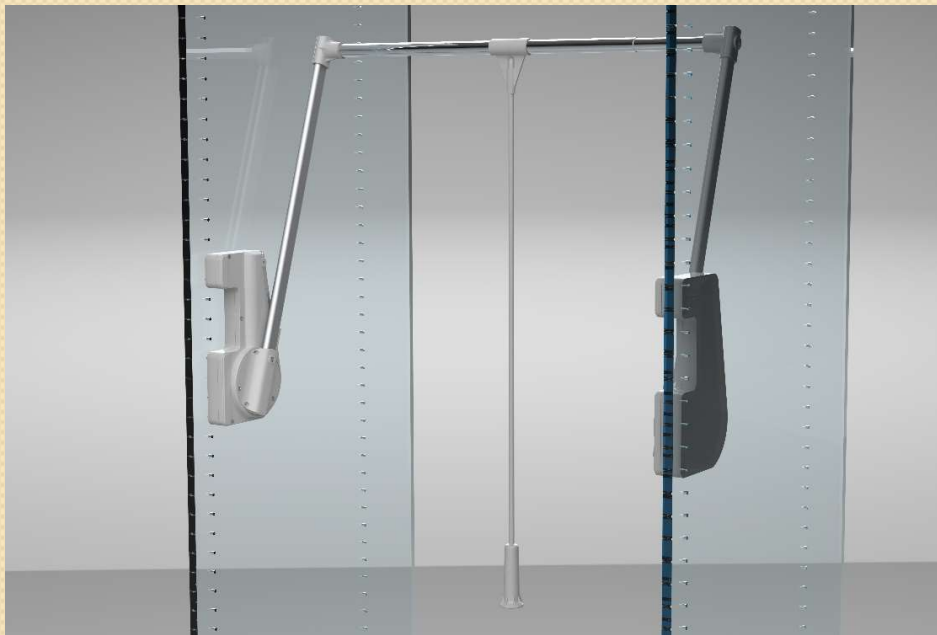

- Load Capacity 10 kgs

LIFT 700

Lift 700 is a mobile coat hanger equipped with a particular shaping of the base designed to incorporate any door hinges.

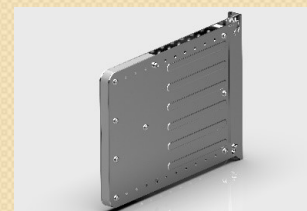

- Load Capacity of 15 kg

SUPERLIFT

- **The highest quality product**
- **Superlift (151)** is the only mobile clothes hanger with adjustable lifting power, thanks to a power regulator in the rear part using a lever (from 1-4 where 1 is the lightest from 14 to 20 kgs) Fully steel mechanism to adapt to the different weight of seasonal clothing: load Capacity 20 kg.
- It is possible to vary the inclination of the arms for different wardrobe depths, thanks to the screw, using a simple manual screwdriver.
- A plastic cover close totally the mechanism, mostly made of steel, without any visible screws.
- Installation is very simple: entirely on System 32, it does not require drilling further holes in the side of the wardrobe, if the drilling of System 32 is on.
- **Using special metal wall brackets (optional)** it can also be applied to the wall or inside walk-in closets.

Why choose Ambos?

The main technical and qualitative differences that make the Lift models unique compared to similar products:

- easy assembly on the pre-drilled System 32 on the front side of the side, without the need to take additional measurements
- grease pump and not oil or air (with oil it is possible that liquid leaks, grease is not as fluid as oil) this particular mixture of grease, when used in the passage from one chamber to another, "mounts" with the air and becomes even softer and more performing. Air will discharge over time.)
- arm external to the mechanism to avoid scissors effect on clothes
- complete coverage of the mechanism, where there are no openings and possible breakages of the plastic parts due of continuous use (often it is used a bumper to avoid breaking the plastic, this it does not improve the product, but it is just to avoid breakages of the plastics)
- width adjustment from 75 to 115 cm in the standard, with the possibility of a smaller size for compartments from 53-75 cm or larger for compartments up to 135 cm.

LIFT 360° - Spin your wardrobe

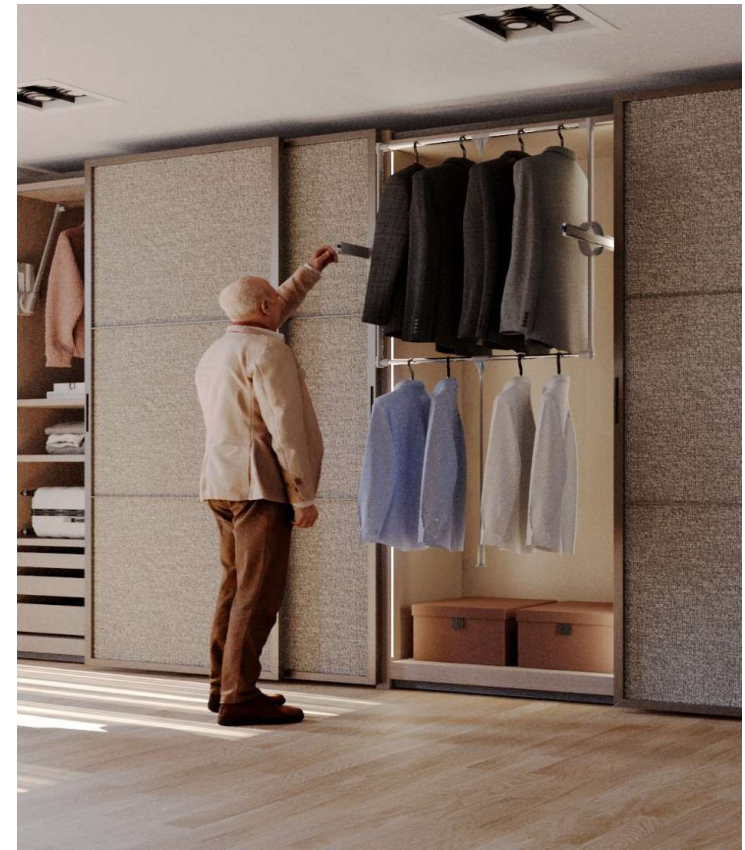

Revolution and comfort in the world of clothing handling

360° Rotation: the simplicity of effortless movement

Gentle and controlled movement for absolute comfort

Fast and convenient installation: the best alternative to electric systems

LIFT 360° - ART. 900 black and gray colours

Lift 360°

is a truly revolutionary solution in the world of clothing handling.

Thanks to the complete 360° rotation, this system allows anyone, even elderly or weak people, to maneuver clothes without ever having to push up. Each tube is equipped with a practical handle that allows you to pull down with a natural movement allowing a simple rotation and reducing effort to a minimum

Gentle and controlled movement

The carousel-like tilting structure ensures that the rotation and pulling movement are always gentle and controlled accommodating the strength of the user. The system works best when the weight is evenly distributed across the two tubes, ensuring smooth, soft rotation.

Fast and convenient installation: the best alternative to electric systems

In addition to its performance, Lift 360° stands out for its speed of installation: it can be easily mounted in the wardrobe (even on System 32) with just a few screws to fix the guides and tubes, becoming an ideal alternative to expensive electric lifts.

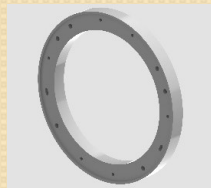

LIFT

* GREY COLOUR ONLY

101 – 102 – 103

Even today, **Lift** is the unsurpassed mobile coat hanger for single and double door wardrobes. You can lift and lower up to 12kg of clothes on just one arm. In double-door wardrobes, the solution with separate lifts, right and left, allows the weight of the clothes to be moved to be halved. In the loading position, the arm locks in a position to allow easier access to clothes.

- **Capacity of 12 kg + 12 kg**
- Important specs:
 - Arm lock in loading position
 - Also ideal for single-door wardrobes with compartments up to 60 cm wide
 - Pneumatic pump
 - Professional product

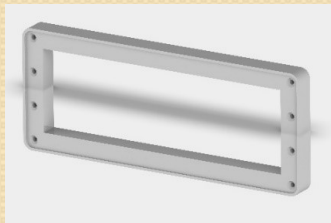

LIFT 500

*** GREY COLOUR
ONLY**

is essential, functional and equipped
with a removable hanger holder for
temporarily holding clothes.

Capacity of 10 kg

LIFT 750

* VERTICAL ARM

Lift 750 has been designed for those who prefer to apply the coat hanger in a vertical position in the center of the wardrobe. An excellent product, it is also equipped with two pretty little boxes, Am-box, which, in addition to making its design compact and linear, can contain perfumers for clothes or small everyday objects.

Load capacity 15 Kg

Wardrobe: lower part

UNDER-SHELVES both in gray and black colors items, are a good versatile solution for the lower part of the wardrobe, to be easily installed under the shelves: Trouser racks, Hanger rack, Accessory rack to complete the line.

Can be supplied for lower depth of 40 cm, instead of the standard (53-51 cm), this can be an advantage for small dimensions.

It is important to underline that the articles are not completely extractable, this is a technical choice that allows for stability both laterally and frontally and give a significant load capacity; unlike totally extractable products, which are poorly performing, they twist and bend forward if the weights are elevated or bad positioned.

Our product is STABLE.

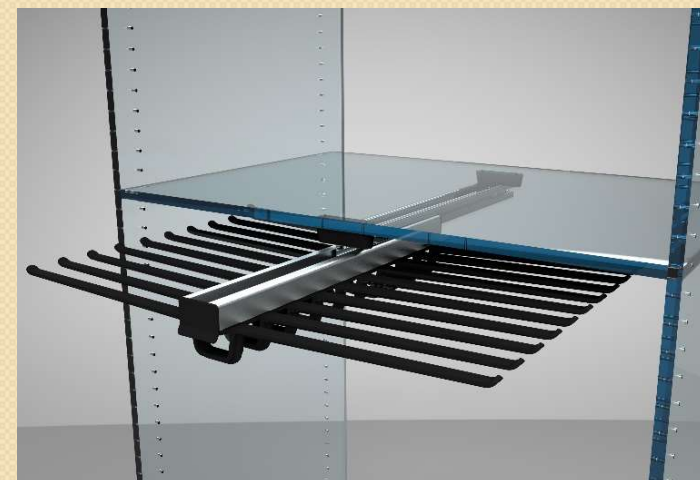

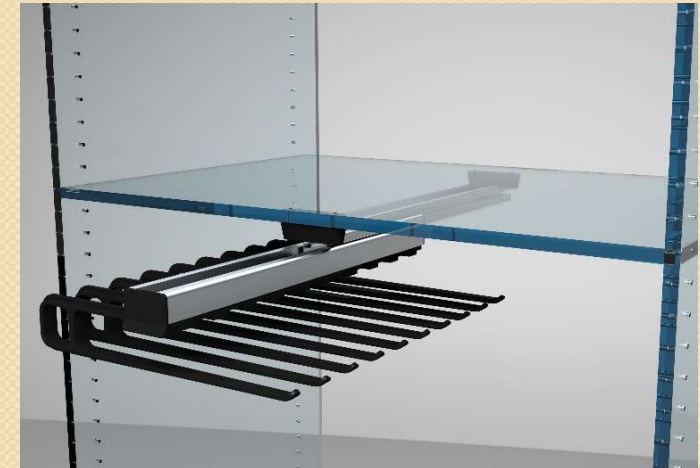

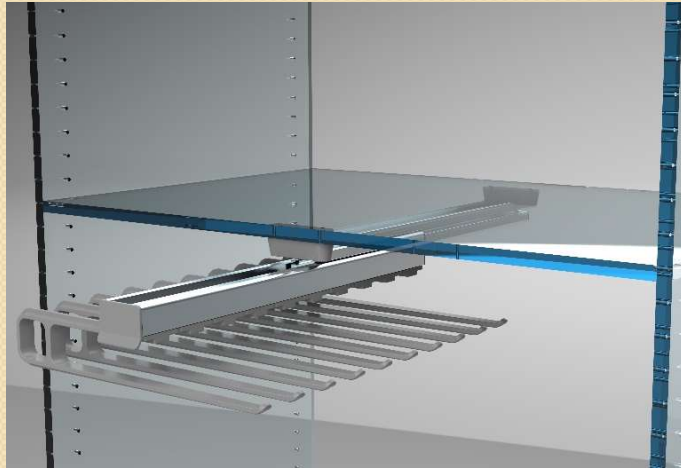

The guide is and internal production in alluminium, they are not painted (this a production choice that contain costs).

TROUSER RACK

407 AND 409

407 (gray and black colour)

Capacity: 10 pants
Partially removable for high frontal
and lateral stability.
Ring seat for holding ties, belts and
scarves
Quick and easy fixing with just four
screws

409 (gray and black colour)

Capacity: 20 pants
Partially removable for high frontal
and lateral stability.
Ring seat for holding ties, belts and
scarves
Quick and easy fixing with just four
screws

HANGER RACK AND ACCESSORY RACK

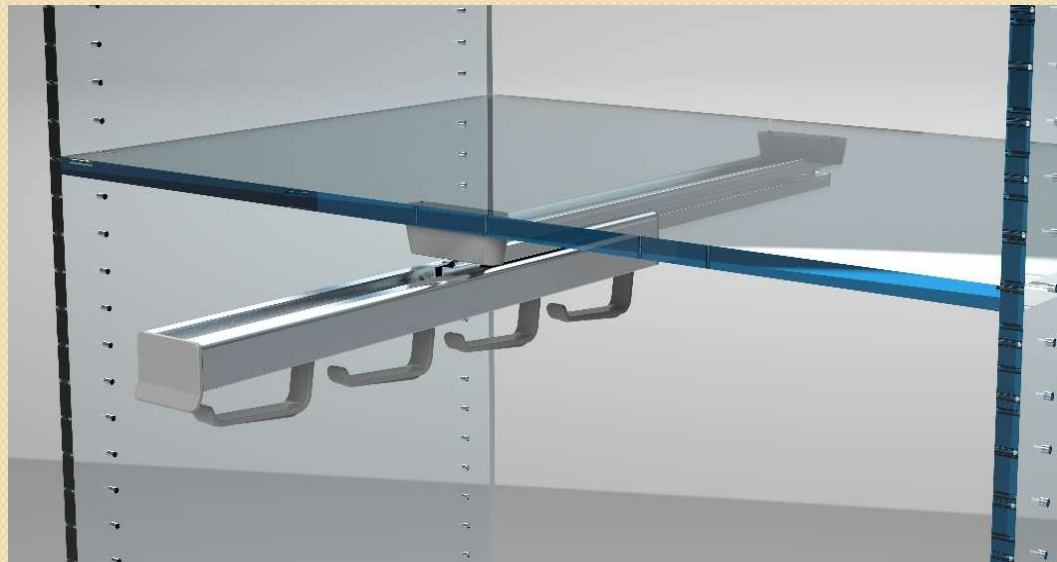

405 (grey and black colour)

The hanger holder is a sailor-style coat hanger, extractable on an aluminum guide that slides on balls, to be applied under the wardrobe shelves.

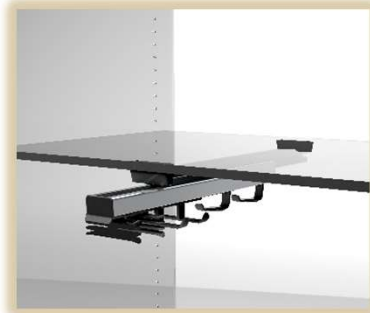

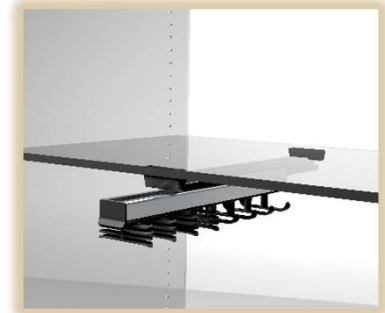

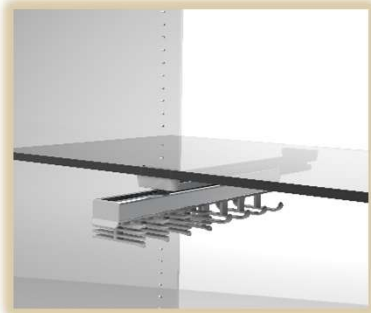

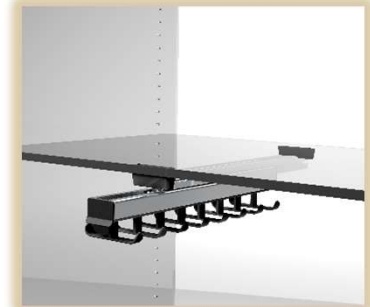

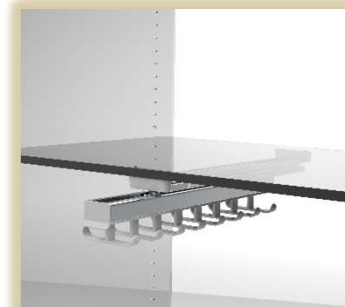

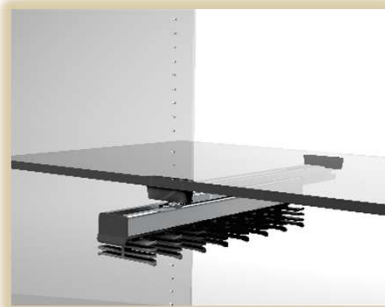

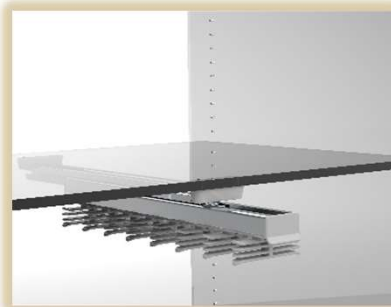

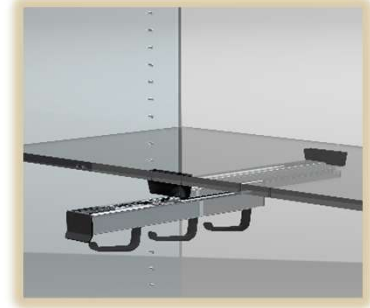

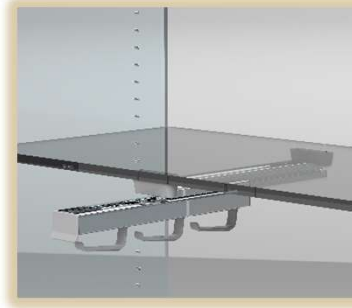

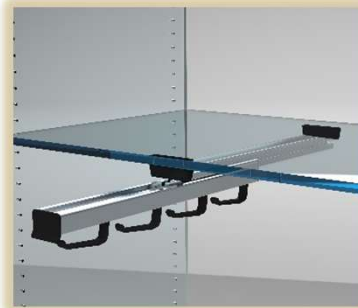

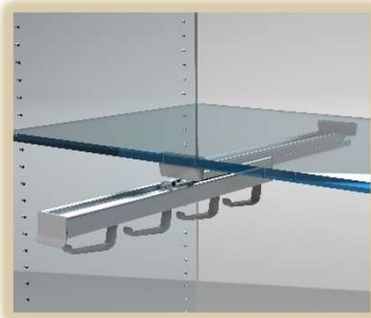

421 – 422 – 423 – 424 (grey and black colour)

The different shape and arrangement of the various seats allows for versatile use of the product, allowing the accommodation of many types of clothing accessories.

- It is important to underline that the articles are not completely extractable, this is a technical choice that allows for stability both laterally and frontally and give a significant load capacity; unlike totally extractable products, which are poorly performing, they twist and bend forward if the weights are elevated or bad positioned.
- Products are STABLE.
- The guide is and internal production in aluminium, they are not painted (this a production choice that contain costs).

Under-shelves : Hanger rack and accessory rack

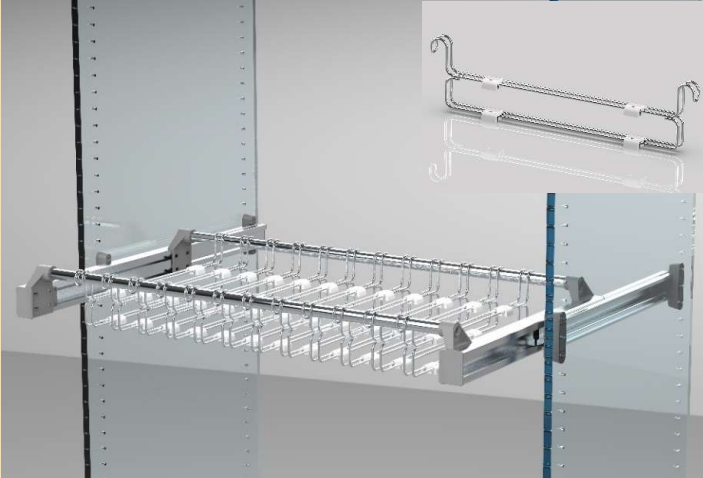

TROUSER RACK

401 AND 402

The front trouser holder is a system of sliding and removable frames, available in both nylon and chromed steel.

Important specs:

- High capacity thanks to 12 ring supports: 24 trousers.
- Sliding and removable supports.
- Structure adjustable in width (from 75 to 115 cm).
- Possibility of adding further nylon supports (Art. 415/A), based on the width of the cabinet.
- Easy and total fixing on the “System 32” drilling, if present.
- Possibility of adding further hangers (Art. 416), based on the width of the wardrobe.
- Width adjustment from 75 to 115 cm as standard size, with the possibility of a smaller width for compartments from 53-75 cm or larger for compartments up to 135 cm.

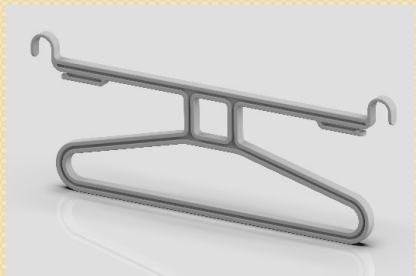

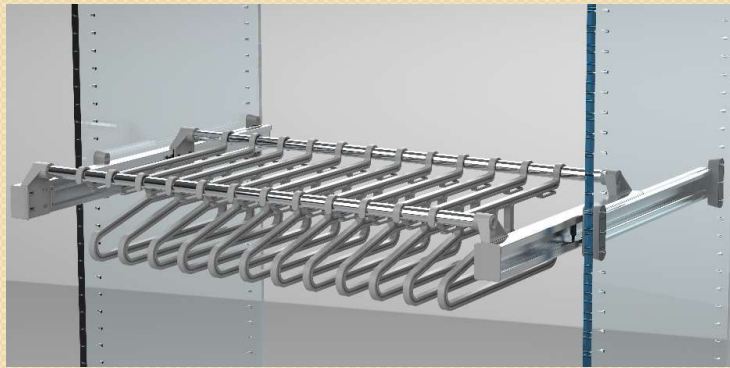

SIDE TROUSERS RACK 201

- It is mounted on only one side of the wardrobe (either right or left). The sturdy aluminum guide, with three profiles sliding on balls, allows it to be completely extracted from the cabinet and has a high load capacity. It is equipped with 8 shelves, made of nylon reinforced with glass fibre, removable, equipped with clips for skirts and trousers (hanging or folded), and a place to hang a belt or a tie.
- Important specs:
 - High capacity: 16 pairs of pants
 - Removable media
 - Also suitable for skirts
 - Application on one side of the wardrobe only
 - Total extractability
 - High load capacity: 8 kg
 - Maximum use of space
 - Easy and total fixing on the “System 32” drilling

CLOTHES RACK

404

From the revisitation of a single simple 'hanger', integrated with an extractable system, a complex but at the same time simple accessory was born, capable of supporting and making accessible entire clothes, suits and sets: jackets, trousers, skirts, shirts.

Thanks to the particular design, these hangers also accommodate belts, ties and scarves.

- High capacity of 12 hangers (12 jackets – 24 pairs of trousers).
- Sliding and removable hangers.
- Ring seat to accommodate ties, belts and scarves.
- Structure Adjustable in width (from 75 to 115 cm).
- Easy and total fixing on the System 32 drilling.
- Possibility of adding further hangers (Art. 416), based on the width of the wardrobe.
- Width adjustment from 75 to 115 cm as standard size, with the possibility of a smaller width for compartments from 53-75 cm or larger for compartments up to 135 cm.

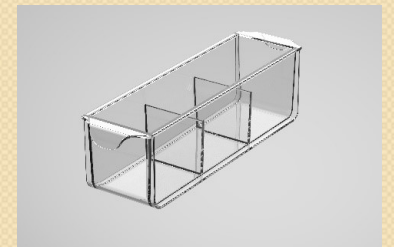

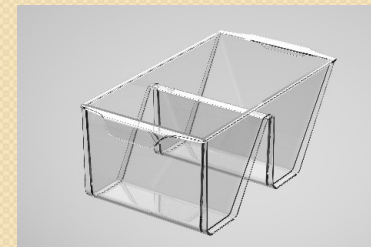

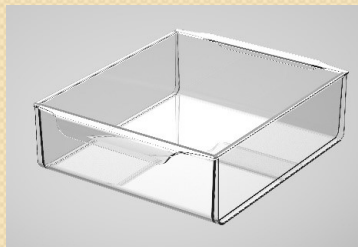

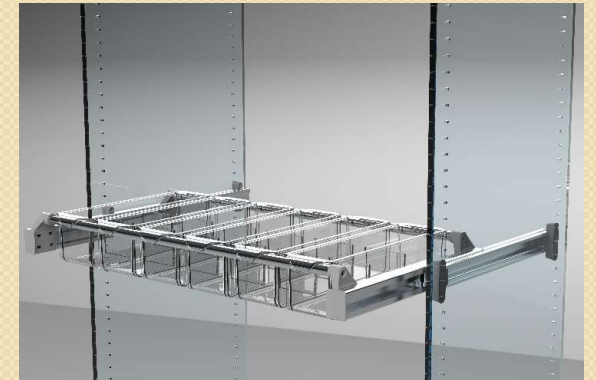

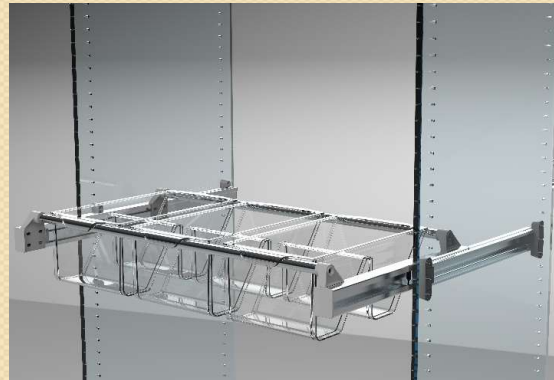

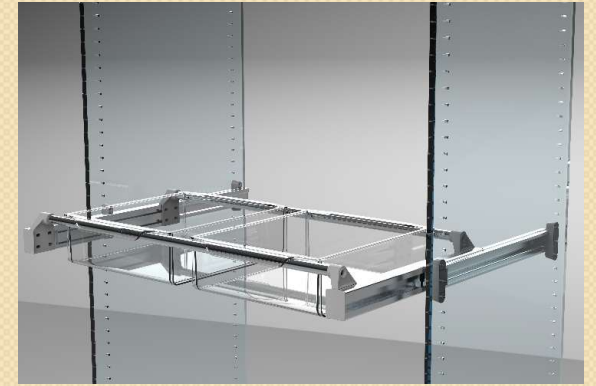

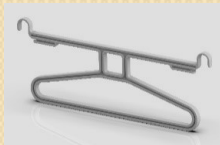

DRAWER SYSTEM

For the lower part of the wardrobe, from the trouser rack structure. With a series of products, to be housed on the extractable and width-adjustable structure, the lower part of the wardrobe can be set up, combining containers of various sizes and uses: from garments of bulkier clothing, up to the smallest objects and linen, with full freedom of composition.

411
