

AIRLESS marine M12

AIRLESS Marine M12

Technical features:

- EC compliant electric motor equipped with a motor protector
- Power: Single-phase kW 1.8 V.230/50 Hz
- Noise level per EC standards (75 dB)
- Maximum Pressure: 230 Bar
- Free delivery: 9 l/min
- Maximum diameter of spray nozzle hole: 0.041"
- Prevalence: 70 metres

TECNOVER airless paint sprayer mod. Marine M12 has been designed specifically for the nautical world.

This model is in fact made for the application of Antifouling paints, GelCoat and Epoxy Resins. The Airless method guarantees a very high-performance coating without fog formation.

This painting system sends the high-pressure product to the gun equipped with a tungsten-carbide nozzle.

The pressure drop at the outlet of the latter causes the atomisation of the product that arrives at low speed on the surface to be painted.

Since there is no transport air and there is minimal product rebound, the result is a substantially zero overspray.

There are many benefits:

- very high yield since there is no dispersion of the product
- speed of application
- no fog to damage the operator's health

The standard kit consists of:

TECNOVER airless paint sprayer mod. Trolley-mounted Marine M12

6-litre gravity tank

Connector with a pressure gauge

High-pressure hose sing. metal braid diam. 1/4" , WP 300 Bar, length 10 metres

B500 Professional Airless Spray Gun

Extension of 50 cm for Airless Spray Gun

Kit Base + Paintip self-cleaning nozzle

Guaranteed by the TECNOVER brand, a leading Italian company with over 35 years of experience in the sector that guarantees reliability and efficiency over time.
