INTEGRATED IRONING SYSTEMS

PRODUCT CATLOG

About us

Vapor Design SRL is an Italian company based in Nove (VI), specializing in the production of high-quality ironing boards. Founded in 2010, Vapor Design quickly established itself in the market thanks to the extensive experience of its owner, who has been active in the industry long before the company's inception.

Ous products

We offer a wide range of steam ironing and cleaning solutions, with a focus on quality, reliability, and innovation. Our offering includes: ironing boards with integrated boilers, stand-alone ironing boards, steam boilers with iron, steam cleaning systems, and much more!

Each of our products is designed to meet the needs of both domestic and professional customers, ensuring excellent and lasting performance.

Who we serve

We primarily target distributors, who make up the majority of our clientele, but we also offer direct solutions for end customers. We collaborate with reliable partners to distribute our products nationally and internationally, always with the goal of providing impeccable service and superior quality products.

Why choose Vapor Design

With a constant commitment to innovation and quality, Vapor Design stands as a benchmark for those seeking advanced solutions for ironing and steam cleaning. Each of our products is the result of years of experience and research in the industry, offering our customers only the best.

SEMI-PROFESSIONAL IRONING STATION WITH INTEGRATED BOILER

PERLA

Description

Discover the "Perla" Ironing Board, the perfect combination of elegance and functionality. This high-quality product is designed to offer superior performance, making every ironing session a pleasant and effortless experience. The integrated boiler ensures powerful and consistent steam, available in two types: pressure, for quick and professional results, and refill, allowing uninterrupted work for maximum convenience and flexibility. The suction function holds the fabric in place and instantly dries it, while the blow function helps with steaming bulky items, with both functions activated automatically by the steam from the iron. Additionally, the heated board eliminates moisture, keeping the work surface always dry.

Equipped with a professional iron with a die-cast aluminum soleplate and an ergonomic cork handle, "Perla" ensures maximum comfort during use. The height-adjustable board with nine settings and double safety lock allows for customization to suit every user, while the built-in stand enables comfortable ironing even while seated. With the option to customize the color of the legs, "Perla" seamlessly integrates into any space, adding a touch of style to your workspace.

Made with top-quality materials, "Perla" is the ironing board every home deserves: not just a tool, but a true piece of furniture. Elevate your ironing standard with "Perla" – where design meets efficiency.

Customizations

Perla can be customized to perfectly meet individual or professional needs. We offer several configuration options, including:

- Custom Boilers: Choose between pressure or refill boilers, adaptable to any usage frequency.
- Design: Customizable finishes to best fit any environment.
- To enhance the functionality and convenience of your ironing board, we offer a selection of high-quality accessories that ensure flawless results and optimal comfort:
- Air Piston: For smooth and adjustable lifting, perfectly adapting to any need
- Teflon Soleplate: Protects delicate fabrics and ensures smooth gliding.
- Sleeve Ironing Kit: Ideal for precise sleeve ironing without creases.
- Clothes Hanger Kit: Practical support for hanging freshly ironed garments
- Ironing Board Cover with Padding: Provides a softer and more comfortable ironing surface.
- Sleeve Ironing Cover with Padding: Designed for precise and careful sleeve ironing.

Technical features

Boiler capacity	1,5 l / Unlimited
Boiler electrical power	1150 W
Board heating element power	200 W
Work surface	120x37 cm
Bi-rotation engine power	40-60 W
Iron heating element power	800 W
Steam pressure	3,2 bar
Weight	22 kg
Included accessories	Steam hose holder rod, filling jug, silicone mat

DIAMANTE

Description

Discover the "Diamante" Ironing Board, designed to offer high performance and turn ironing into a pleasant, uninterrupted experience. With the refill version of the integrated boiler, it ensures continuous, uninterrupted ironing for consistently flawless results.

The suction function holds the fabric in place and instantly dries it, while the blow function facilitates the steaming of bulky garments. Both functions are automatically activated by the steam from the iron, ensuring efficient, crease-free ironing. Additionally, the heated board eliminates moisture, keeping the work surface always dry and ready for use.

The professional iron is equipped with a high-quality aluminum soleplate and an ergonomic cork handle, ensuring precise control and optimal glide on every fabric. With a height-adjustable board featuring nine settings and a double safety lock, Diamante easily adapts to all needs, whether you're ironing standing or seated, thanks to the specially designed stand for maximum comfort.

Made with top-quality materials, Diamante is not just a high-quality tool, but also a true piece of furniture that enhances any workspace. Choose Diamante to elevate your ironing standard, where elegance and functionality come together in perfect harmony.

Customizations

The "Diamante" Ironing Board is designed to perfectly suit your individual and professional needs. We offer several configuration options, including a fully customizable design: selectable finishes to harmoniously integrate into any environment.

To further enhance the functionality and convenience of your ironing board, we offer a selection of high-quality accessories that ensure flawless results and maximum comfort:

- Air Piston: Allows smooth and adjustable lifting, adapting to any need.
- Teflon Soleplate: Protects delicate fabrics and ensures smooth gliding.
- Sleeve Ironing Kit: Ideal for precise and crease-free sleeve ironing.
- Clothes Hanger Kit: A practical support for hanging freshly ironed garments.
- Ironing Board Cover with Padding: Provides a softer and more comfortable ironing surface.
- Sleeve Ironing Cover with Padding: Designed for precise and careful sleeve ironing.

ZAFFIRO

Description

The "Zaffiro" Ironing Board combines style and functionality at a competitive price, delivering professional performance without compromise. Equipped with an integrated pressure boiler, it ensures powerful and consistent steam for fast and flawless ironing.

Zaffiro is designed for those who seek a high-quality, customizable product, with the option to choose aesthetic finishes to perfectly match any environment. While maintaining all the advanced features of higher-end models, such as automatic suction and blowing functions activated by the steam from the iron, a heated board, and adjustable height, Zaffiro is the ideal solution for those seeking elegance and performance at an affordable price.

Zaffiro – the touch of class that completes your ironing.

Customizations

The "Zaffiro" ironing board is designed to perfectly meet your individual and professional needs while maintaining a competitive price. We offer various configuration options, including a fully customizable design with selectable finishes to seamlessly blend into any environment.

To further enhance the functionality and practicality of your ironing board, we provide a selection of high-quality accessories that ensure impeccable results and maximum comfort:

- Air piston: enables smooth and adjustable lifting to suit every need.
- Teflon soleplate: protects delicate fabrics and ensures smooth gliding.
- Sleeve ironing kit: ideal for precise and wrinkle-free ironing of sleeves.
- Clothes hanger rod kit: a practical support for hanging freshly ironed garments
- Ironing board cover with padding: provides a softer and more comfortable ironing surface.
- Sleeve board cover with padding: designed for precise and careful sleeve ironing.

STAND-ALONE IRONING STATION

OPALE

Function and accessories

Adjustable board height in 9 different positions with a safety lock. Suction mode to secure the fabric and ensure instant drying, blowing mode for steaming delicate fabrics, and heating to eliminate moisture from the ironing board. The blowing and suction functions are automatically activated through the iron rest grid. A button is also available to operate the fan in continuous mode.

The ironing board comes equipped with a boiler holder grid.

It is also compatible with sleeve boards and a clothes hanger rod, making it suitable for ironing hanging clothes.

Side wheels for easy transport when open and cross wheels for convenient movement when folded.

Technical features

Board heating element power	200 W
Work surface	120x37 cm
Bi-rotation engine power	40-60 W
Iron heating element power	800 W
Weight	13 kg
Included accessories	Steam hose holder rod, silicone mat

MARBLE

Function and accessories

The Marble ironing board is the perfect solution for those seeking practicality and essential functionality. Designed for domestic use, this model combines lightness and stability, providing a comfortable and secure working surface.

It is compatible with all boilers in our catalog, offering complete flexibility and a personalized ironing experience.

Main features:

- Sturdy and stable structure
- Compact and lightweight design
- Suitable for all types of irons and compatible with any boiler in our catalog

Technical features

Work surface	120x40 cm
Weight	7 kg

STEAM BOILERS WITH IRON

DASY 1

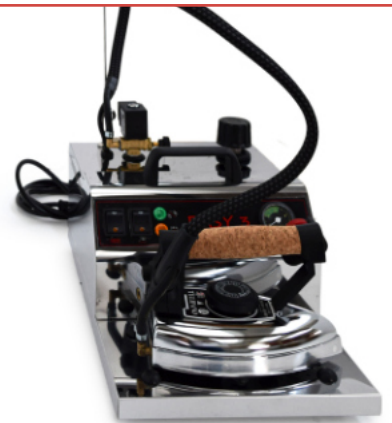

Function and accessories

Discover our Dasy 1 Pressure Boiler, equipped with the Tulipano iron, designed to deliver professional performance at an affordable price. Thanks to its innovative constant pressure technology, this boiler provides powerful and continuous steam, making it perfect for effortlessly removing wrinkles from even the most challenging fabrics.

Technical features

Boiler capacity	1,5 l
Boiler electrical power	1115 W
Iron heating element power	800 W
Boiler pressure	3 bar
Weight	5 kg
Included accessories	Steam hose holder rod

DASY 3

Function and accessories

Dasy 3 is designed for long, uninterrupted ironing sessions. Our high-capacity boiler ensures a large steam autonomy. Paired with the Tulipano iron, it delivers professional performance, effortlessly removing even the most stubborn wrinkles. Power, quality, and durability in one solution

Technical features

Boiler capacity	2,6 l
Boiler electrical power	1450 W
Iron heating element	800 W
Boiler pressure	3 bar
Weight	5 kg
Included accessories	Steam hose holder rod

MITO 5

Function and accessories

Mito 5 is designed to ensure durable, high efficiency performance. Our 5 liter pressure boiler is ideal for professional use. Its robust structure guarantees reliability, while the 5 liter capacity provides extended working autonomy, offering at least 5-6 hours of uninterrupted ironing, perfect for meeting industrial needs.

With constant, powerful steam output, this boiler is a reliable solution for high-demand productivity environments, combining efficiency and safety.

Available with a boiler cart.

Technical features

Boiler capacity	5,2 l
Boiler heating element power	1000 W + 800 W
Iron heating element power	800 W
Boiler pressure	2,8 bar
Weight	14,5 kg
Included accessories	Steam hose holder rod

Functions and accessories

Maurice offers a simple and effortless experience. Thanks to advanced automatic refill technology, it eliminates the need for manual intervention, ensuring maximum comfort and safety. Ideal for those seeking a practical and reliable solution, designed to make daily use easy and immediate.

The product is aimed at

The Maurice boiler is designed for those seeking a robust and functional solution, ideal for frequent and intensive use. Thanks to its refill boiler and monoblock connection, Maurice is perfect for professional environments that require continuous performance, ensuring reduced refill times and maximum efficiency.

Technical features

Boiler capacity	Unlimited
Boiler heating element power	1000 W
Iron heating element power	800 W
Boiler pressure	3 bar
Weight	5 kg
Included accessories	Steam hose holder rod

Functions and accessories

The Eva boiler combines power and style, offering a refined and functional solution for professional needs. With a continuous refill system, it ensures unlimited autonomy, perfect for long work sessions without interruptions. Built with a sturdy structure and high-quality materials, Eva generates powerful and consistent steam, ideal for intensive use.

The product is aimed at

Its elegant design makes it a perfect complement for any workspace, with modern lines that seamlessly integrate into both professional and domestic settings. Eva is the right choice for those seeking reliable performance and distinctive aesthetics, making every detail of the ironing process an experience marked by quality.

Technical features

Boiler capacity	Unlimited
Boiler heating element power	1000 W
Iron heating element power	800 W
Boiler pressure	3 bar
Weight	5 kg
Included accessories	Steam hose holder rod

ZALYRA

Functions and accessories

Thanks to its instant steam production, Zalyra offers fast and professional performance, perfect for tackling even the most challenging fabrics. The sturdy steel casing ensures durability and reliability. With a 1.3 liter water tank capacity, Zalyra allows for longer, uninterrupted ironing sessions.

The product is aimed at

Zalira is designed for those seeking an affordable, reliable, and practical iron, perfect for everyday ironing needs at home. Ideal for families and anyone looking for a quality product without compromising on affordability, it is the perfect choice for combining functionality and ease of use. Zalira meets domestic needs efficiently, making ironing faster and more accessible.

Technical features

Tank capacity (rechargeable during use)	1,3 l
Heating element power	1400 W
Iron heating element power	800 W
Steam flow rate	80/100 g/min
weight	5,4 kg
Included accessories	Asta reggi filo

IRONS

Tulipano

Features

The Tulipano Iron is a professional product, ideal for advanced domestic use. Featuring a lightweight yet sturdy structure, it delivers excellent performance thanks to its monolithic soleplate and anti-scale system. With rapid heating and even steam distribution, it is perfect for all types of fabrics, ensuring flawless results in no time.

Soleplate	Monolithic with anti-scale filters, polished
Heating element power	800 W, embedded in the soleplate
Weight	1.35 kg
Electrical connections	Fully insulated from steam and heat
Usage	Domestic e professional

Dublo

Features

The Dublo Iron is a professional device designed to deliver high performance in both domestic and professional settings. The armored heating element embedded in the soleplate ensures fast and consistent heating, while the quick-release thermostat with an integrated thermal fuse allows precise temperature control. Available with a Soft Touch or cork handle.

Soleplate	Monolithic with anti-scale filters, polished
Heating element power	800 W, embedded in the soleplate
Weight	1.20 kg
Electrical connections	Fully insulated from steam and heat
Usage	Domestic e professional

Dublo maschio

Features

The Dublo Max Iron is designed to meet the needs of experienced users. Equipped with a monolithic soleplate, it ensures effective ironing on any garment. The armored heating element and quick-release thermostat make this iron an indispensable ally for intensive ironing tasks. With its ergonomic handle, the Dublo Max guarantees comfort and reliability even during prolonged use.

Soleplate	Monolithic with anti-scale filters, polished
Heating element power	800 W, embedded in the soleplate
Weight	1.35 kg
Electrical connections	Fully insulated from steam and heat
Usage	Domestic e professional

Professional

Features

The Professional Iron is designed for experienced users seeking high-level performance. Also suitable for industrial use, its 25 mm aluminum soleplate ensures even heat distribution, preventing overheating. The cork handle provides an ergonomic grip and protects the hand from heat.

Soleplate	Monolithic 25mm thickness
Heating element power	800 W, embedded in the soleplate
Weight	1.75 kg
Electrical connections	Fully insulated from steam and heat
Usage	Domestic e professional

Vapor Eco

Features

The Vapor Eco Iron is the most affordable model in the range, yet it delivers performance comparable to higher-end models. Lightweight and efficient, it is ideal for domestic use. The aluminum soleplate, with an internal pathway, ensures superheated steam at the outlet, preventing condensation.

Soleplate	Aluminium
Heating element power	800 W, embedded in the soleplate
Weight	1.1 kg
Electrical connections	Fully insulated from steam and heat
Usage	Domestic

STEAM CLEANING MACHINES

INJECTION

Injection is a high-performance steam cleaning machine, designed to deliver professional results thanks to an innovative system that integrates detergent into the steam flow. This feature allows for deep and thorough cleaning, ideal for surfaces that require complete and hygienic disinfection. The ability to exclude the detergent and use only steam makes Injection extremely versatile and suitable for various types of tasks.

The machine is equipped with a stainless steel boiler with a capacity of 3 liters and a 2200 W electric heater, ensuring continuous steam delivery even during the most demanding tasks. The stainless steel casing is designed to withstand the toughest working conditions.

Technical features

- Continuous refill boiler with a 3 liter capacity, made of stainless steel.
- Casing made of AISI 430 stainless steel
- Voltage: 230 V
- Boiler power: 2200 W
- Boiler working pressure: 8 bar (170°C)
- Warm up time: 7 minuti
- Steam flow rate 80/100 g/min
- Water tank capacity: 5 litri
- Detergent tank capacity: 5 litri
- Supply power cable length: 3,5 m
- Flexible hose length: 3,6 m
- Machine weight: 13 kg

Accessories

The machine is equipped with various accessories that enhance its versatility: Single flexible hose, two extensions, rectangular and triangular brushes, different types of lance, brushes to apply to the lances, and a window squeegee brush.

VD4

The VD4 is a steam cleaning machine with suction, designed to deliver high performance in professional environments. Equipped with a 1750W boiler that operates at 8 bar pressure, this machine ensures a constant steam output, allowing for deep and effective cleaning. Thanks to a 1100W motor, it is capable of suctioning and collecting all dirt residues loosened by the steam from surfaces. The stainless steel casing ensures resistance to wear and corrosion, guaranteeing unmatched durability. The VD4 is the ideal choice for those seeking efficiency and reliability in one solution, perfect for tackling even the most stubborn dirt.

Technical features

- Continuous refill boiler with a 3.5 liter capacity, made of stainless steel.
- Casing made of AISI 430 stainless steel
- Voltage: 230 V
- Boiler power: 1750 W
- Suction power: 1100 W
- Boiler working pressure: 8 bar (170°C)
- Heating time: 7 minuti
- Suction flow rate 200 m³/h
- Water tank capacity: 5 litri
- Detergent tank capacity: 3-5 litri
- Suction tank volume: 20 litri.
- Power supply cable length: 4 m
- Flexible hose length: 3,6 m
- Machine weight: 20 kg

Accessories

The machine is equipped with various accessories that enhance its versatility: extension hoses, flat nozzle, upholstery suction nozzle, rectangular brush with interchangeable bristles, and lance with two brushes.
