

ELETTROMECCANICA

COMPANY PROFILE

Presentation 2025

OUR HISTORY

CDC ELETTROMECCANICA is an Italian company **leader in the sector dedicated to electronic and electromechanical timers, temperature controls, cam controllers, engines, gearboxes and gearmotors.**

Thanks to experience in design, gained during **60 years of market presence**, CDC ELETTROMECCANICA's products are, today, well-known and **appreciated all over the world** by the most important manufacturers of professional dishwashers, glass washers, ice machines, ovens, refrigeration counters, incubators for eggs and much more.

Design creativity, research strategy, sophisticated know-how and **customized solutions** have enabled CDC ELETTROMECCANICA to respond to the diverse needs of customers, ever more demanding and paying attention to small details every year.

OUR ROOTS:

The company was founded during the 50s by two partners:

Mr. Angelo Centimerio and **Mr. Alberto Capitanio**

starting work in Az Fiber and later branching out, starting production from a cellar, to the solid reality of today.

Then in 2002 occurred the generation change and the current management team took over

Alberto
Capitanio

Angelo
Centimerio

OUR TIMELINE:

1990

Moving to the current head offices and production site

1960

Starting up as a manufacture of electromechanical timers

2016

*Acquisition of the company Fiber expanding the products portfolio; cam programmers, motors and motor gearboxes.
Substantial increase in company turnover*

OUR TIMELINE:

2018

*Implementation of the company's quality system
in conformity with international standard UNI EN ISO 9001*

2017

*New assembly and test line for camprogrammers.
New automatic machine for assembly and test
motors to double the production capacity*

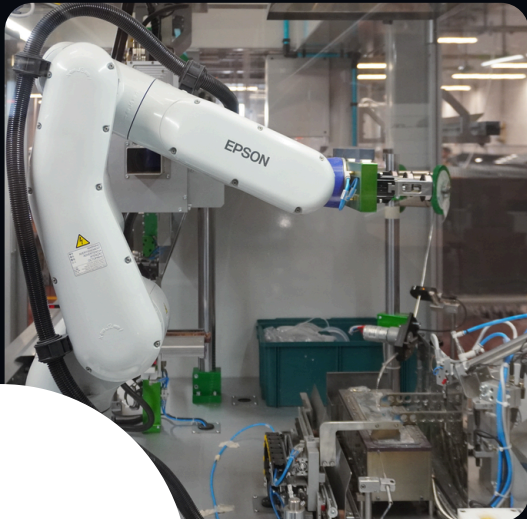

2025

*National and international sales network
reorganization with the aim of optimizing
results and ensuring customer satisfaction*

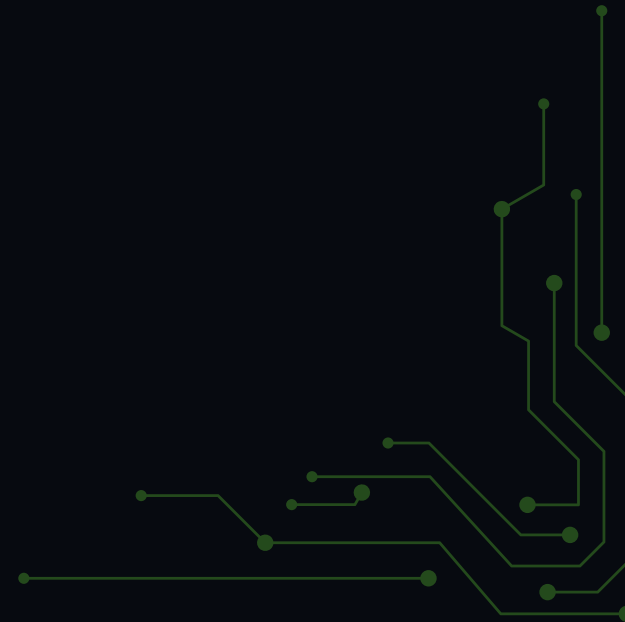

TECHNOLOGY AND INNOVATION

Pictured is our **3D visualiser**, which is used daily in our product quality control processes to minimise non-conformities and ensure a consistently high performing product

Pictured is our **robotic coil machine**, one of our latest investments in order to stay up-to-date and in step with the times

RECENT INVESTMENTS:

Our **robotic coil machine** was one of our last major investments, almost **800,000 euros** of **investment** to increase production capacity. this machine has also allowed us to significantly **raise product quality** as it automatically performs quality control, and working on an 8-hour shift, produces around 1700 reels. this, positions Elettromeccanica CDC as a company with solid roots in the present but always with an eye on **innovation** and the **future**.

RECENT INVESTMENTS

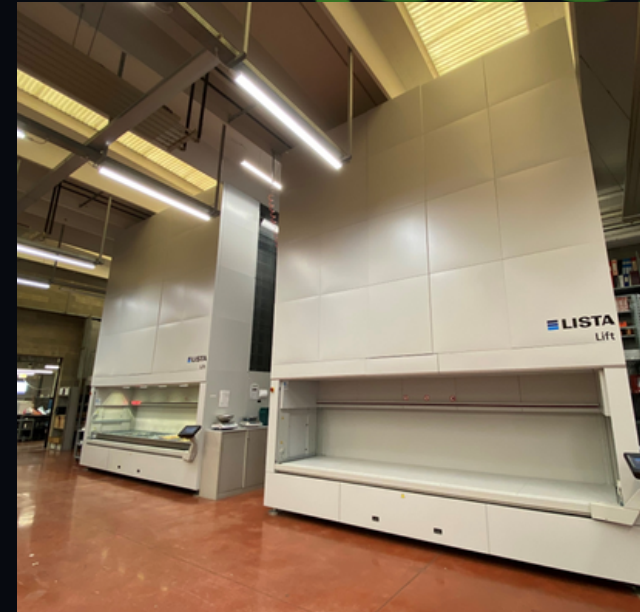

NEW VERTICAL LIFT MODULES

2019 – 2021 – 2023

Automated Storage Vertical Lift Modules to stock our products

Manufacturer: Modula

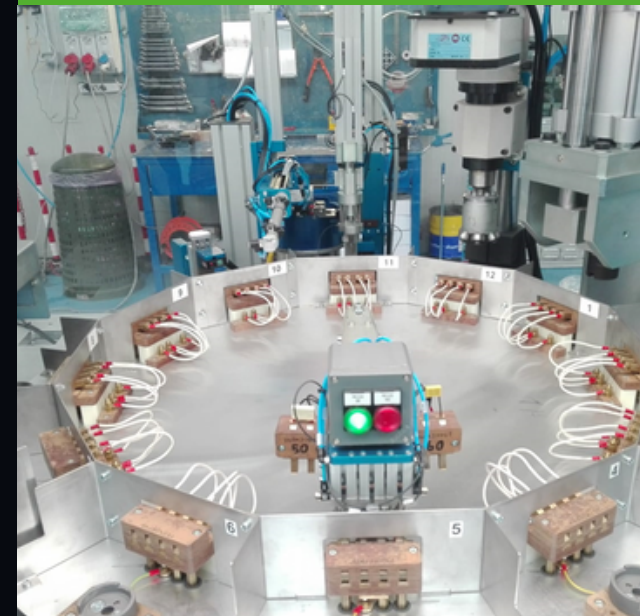

NEW MACHINE FOR MOTOR ASSEMBLY

2019

Customized Assembly Machine for motors

Manufacturer: R4 Automazioni

Production capacity: 1.000 pieces/day

OUR QUALITY, GUARANTEED FOR OUR CLIENTS

Our aim is to supply our clients with best solutions. We therefore focus our attention on production conditions, which must be optimal. Only in this way can we achieve our goal of error-free production and, consequently, guarantee the **long working life of our products**, even in the toughest application cycles of our customers. All this is achieved through continuous analysis, monitoring and improvement of all processes, both in production and administration.

TOP QUALITY MATERIALS

We also pay attention to the highest quality when selecting the materials we use. All incoming materials are analyzed carefully to verify compliance. A good product starts right from the material it is made with.

CONTINUOS TRAINING

For us, it is not only the material and the machines that affect quality, but above all our **skilled and motivated employees**. This is why we offer numerous training and specialization opportunities and give them freedom and responsibility in the activities they are involved in

ACHIEVEMENTS: CDC QUALITY SYSTEM IS CERTIFIED

CDC Elettromeccanica is an **ISO 9001:2015 certified company**.

The standard specifies “the requirements of a quality management system when an organization needs to demonstrate its ability to regularly provide products or services that meet customer requirements and applicable mandatory requirements and aims to increase customer satisfaction through the effective implementation of the system, including processes to improve the system and ensure compliance with customer requirements and applicable mandatory requirements”.

The certification authority INTERTEK has recognized the company's compliance with ISO 9001:2015 for the following scope of application:

Design of electromechanical products, manufacture of electromechanical and electronic products, such as geared motors, timers and the like.

The new path undertaken is a further factor of development and professional growth, indispensable to face the new challenges of the global market in which we operate.

CDC Elettromeccanica, strong of a consolidated experience in over 60 years of work, looks more and more with confidence to the future.
