

BADA Material Handling

Quality and reliability in material handling with 100% Made in Italy solutions.

Who We Are

Our Story

From the very beginning, our philosophy has been based on three fundamental pillars: **impeccable quality**, **continuous innovation** and a deep **respect** for the needs of our **clients**.

Over the years, we have consistently **invested** in research and development, adopting the most advanced technologies and perfecting our **production processes**. This has allowed us to create a range of products that stand out for their **robustness**, **reliability** and **cutting-edge design**.

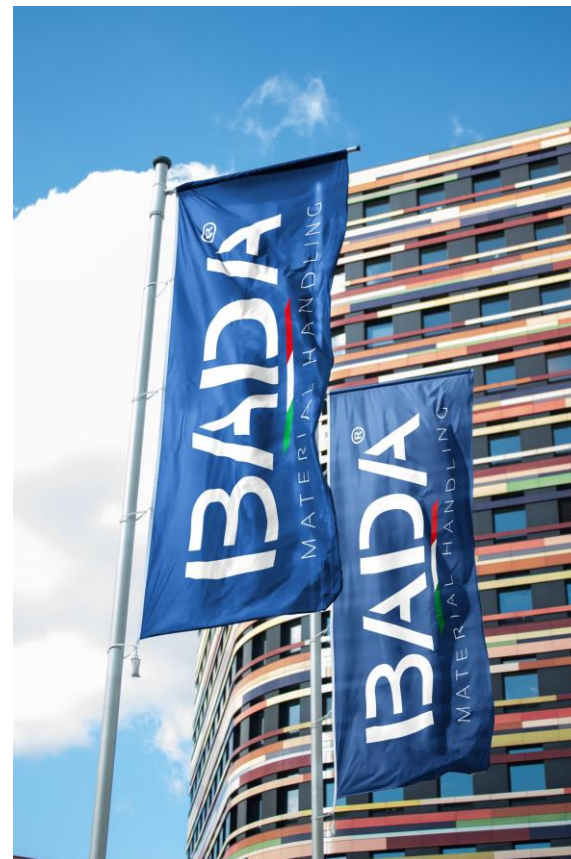

Today, Bada Material Handling is a benchmark in the market, recognized for its **excellence** and for its ability to offer solutions that meet even the most complex needs.

Who We Are

Towards the Future

Our commitment to the future is to continue to **innovate**, always keeping the **quality** of our products and the **satisfaction** of our customers at the center.

We are proud of our history and our tradition, and we are ready to face the challenges of the future with the same **passion** and **determination** that have guided us from the beginning.

Where We Are Present

Solutions for Every Sector: Food Industry

From meat processing to dairy production, our stainless steel solutions guarantee **maximum hygiene** and compliance with HACCP regulations.

Our pallet trucks and stackers are designed to withstand frequent washing and aggressive environments, ensuring the **safe handling** of food.

Where We Are Present

Solutions for Every Sector: Pharmaceutical Industry

Sterile and rigorous environments require equipment that meets the **highest standards** of cleanliness and **safety**. Our products are designed for use in cleanrooms and for handling sensitive pharmaceutical products.

We comply with GMP and FDA regulations, for **safe** and **reliable** pharmaceutical production avoiding any type of contamination.

Where We Are Present

Solutions for Every Sector: Chemical Industry

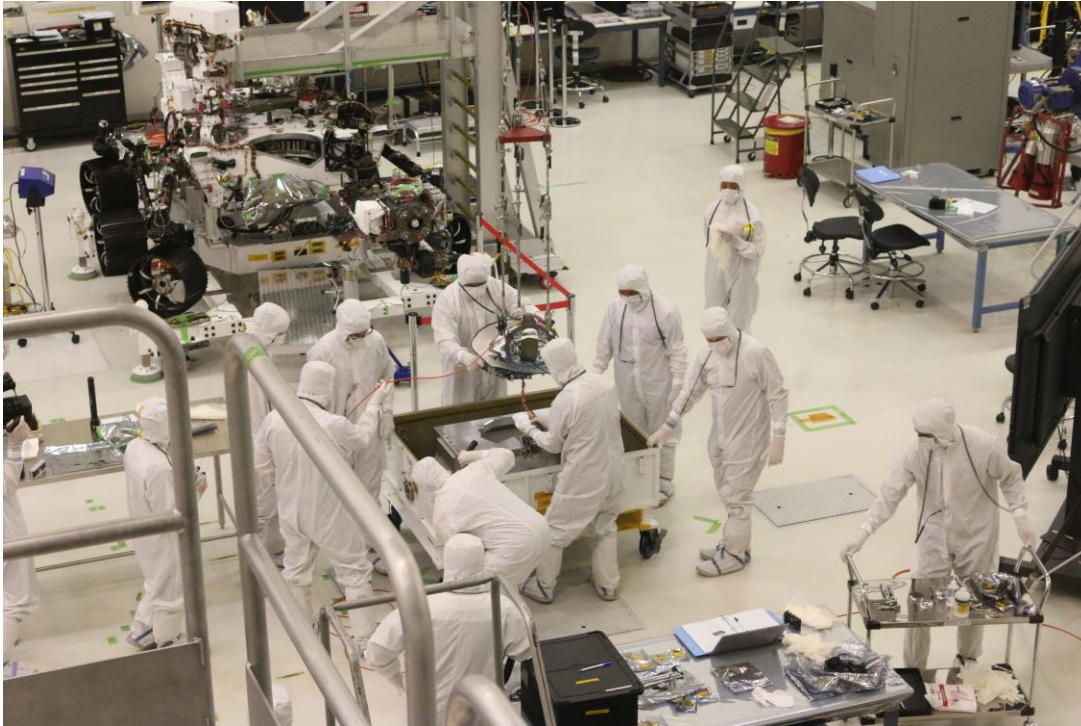

Corrosion and chemical **resistance** are essential in this sector. Our stainless steel pallet trucks and stackers are designed to withstand even the most **aggressive environments**.

Our products ensure the **safe** handling of chemicals, with products that guarantee maximum durability and reliability avoiding contamination.

Where We Are Present

Solutions for Every Sector: Cleanroom and Microelectronics

Environments where contamination must be minimized require products with **perfect finishes** and corrosion resistance. Our products are suitable for this purpose.

The **satisfaction** of our **customers** every day allows us to continue our mission.

Our Range

Complete Solutions for Material Handling

Our product range is designed to offer **complete** and customized **solutions** for material handling in demanding environments:

- Stainless Steel Manual Pallet Trucks;
- Stainless Steel Electric Pallet Trucks;
- Stainless Steel Electric and Manual Stackers;

Each of our products is made with **high-quality** stainless steel, to ensure impeccable **durability**, **resistance** and **hygiene**.

Our Range

Manual Pallet Trucks

Our manual pallet trucks are **robust** and **reliable**, ideal for handling loads in tight spaces or at the end of production lines.

Their **ergonomic design** is studied for **comfortable** and **safe** use.

They are available in different capacities and sizes, to adapt to every need and every workplace.

Our Range

Electric Pallet Trucks

Studied and designed for maximum **efficiency** and **productivity**, perfect for handling heavy loads over long distances.

Advanced technology for **precise control** and **smooth driving**, with extraordinary ease of maintenance.

They mount long-lasting batteries for prolonged autonomy, also available with lithium battery.

Our Range

Electric and Manual Stackers

Ideal solutions for the storage and handling of goods vertically.
Compact and manageable **design**, to operate in tight spaces.
High **stability** and **safety**, for handling heavy loads at height.

Unmatched Advantages

The Excellence of Stainless Steel for Your Handling

Unsurpassed Durability and Resistance

The stainless steel chosen for BADA branded machinery guarantees exceptional durability, reducing maintenance and replacement costs over time.

Resistance to corrosion, chemicals and extreme temperatures allows our machines to operate in harsh environments without compromise.

Their robust and reinforced structure is designed to withstand heavy loads and intensive use.

Customization and Flexibility

We design customized solutions to meet the specific needs of each customer, with the possibility of adapting products to different applications and environments.

Technical advice and personalized support, to find the ideal solution and optimize handling processes.

Our wide range of accessories and options allows you to customize products and adapt them to different operational needs.

Unmatched Advantages

The Excellence of Stainless Steel for Your Handling

Reliability and Optimal Performance

The chosen components are only of high quality and also thanks to rigorous production processes, we guarantee reliable and constant operation over time.

The cutting-edge technology and innovative design are designed to optimize performance and improve handling efficiency.

Each machine must pass thorough tests and quality certifications, to ensure compliance with the highest international standards.

Hygiene and Absolute Safety

The surfaces are smooth and easy to clean, for rapid and effective sanitization, essential in the food and pharmaceutical sectors.

Compliance with the strictest hygiene and sanitary regulations guarantees maximum safety for products and operators.

Ergonomic design and advanced safety devices prevent injuries and reduce the risk of contamination.

Unmatched Advantages

The Excellence of Stainless Steel for Your Handling

Made in Italy: Quality and Traditions

From the smallest component, each product is made entirely in Italy, with high-quality materials and workmanship, to guarantee excellence and reliability.

Our knowledge and technological innovation allow us to create products that stand out for design and functionality.

After-sales support and remote technical assistance, for a complete and reliable service.

Long-term cost reduction

Thanks to their long life and reduced maintenance needs, BADA Material Handling products allow you to reduce long-term costs by up to 30%.

The efficiency of our products allows you to optimize work processes, and to have economic savings of up to 40%.
