Ultimate 35+5

Ultimate 35+5 is ideal mountaineering backpack. 100% waterproof thanks to HDry® system. (10.000 mm water column, even on the seams).

Instinct 25

Mountaineering backpack made in Dyneema® Composite Fabric, Cordura® Nylon with SuperFabric® reinforcements to guarantee an excellent combination of light weight and strength.

Instinct 40+5

Mountaineering backpack in Dyneema® Composite Fabric, Cordura® Nylon with SuperFabric® reinforcements to guarantee an excellent combination of light weight and resistance.

Back Systems

Breathable Back

Ultra-breathable back, shoulder straps or waist belt using open-cell padding with super-breathable mesh fabric.

Hollow Back System

Ultra-breathable back, shoulder straps and waist belt with a combination of pre-formed padding with vent channels and super-breathable mesh fabric.

Air Convector Tech

A super-breathable ergonomic back in mesh fabric. The double-density shaped padding ensures excellent breathability. The back panel is supported by a removable polyethylene panel with internal support for improved load distribution and carrying stability.

Double Ergo Adjustment

An extremely practical and comfortable adjustment system using a shoulder strap slide that runs along a self-modelling double framework in aluminium for better weight distribution in the waist area.

Dry Net System

Breathability is guaranteed by mesh fabric, while weight distribution and carrying stability are optimised by a framework.

Fabrics

 **With Dyneema®**

 **With Dyneema®**

CORDURA®

 **SuperFabric®**

HDry

YKK

Twill 500 x 400D

Fabric made in polyester with excellent strength and resistance.

Dyneema®

Ultra-light fabric in high-tenacity DSM Dyneema® fibre.

Dyneema® Composit

Dyneema® Composite is a patented, ultra-lightweight fabric made of flexible non-woven composite laminates which are reinforced with Dyneema® fibers. The variant of DCF selected by Ferrino is a 2-layer laminate material using 1.43 oz/yd 2 DCF and a 50D polyester plain-weave fabric: high tear and tensile strength and an unmatched strength/weight ratio.

Double Diamond Cordura®

Exceptionally robust fabric made with high-tenacity 210D polyamide fibre.

Supertex®

An extremely hardwearing fabric that is ideal for backpacks that have to withstand repeated stresses over time.

Superfabric®

This fast-drying fabric also offers exceptional performance in terms of abrasion and shear resistance.

Reinforced Laminated Fabric

Rip- and scratchproof chlorosulphonated polyethylene.

Hdry®

The Hdry® waterproofing technology is based on a patented lamination technique, where, thanks to the combined action of pressure and temperature, the waterproof membrane is heat welded inside the backpack.

With the Hdry® system, the membrane is prepared in a 3D shape that, by adapting to the shape of the backpack, adheres to the inner surface, perfectly sealing the seams and any other point where water can enter. This process makes the backpack completely waterproof (10.000 mm water column, even at the seams), and increases the resistance of fabrics guaranteeing improved durability.

Tripleseam

Fabrics are joined together using a double overlapping seam, protected by nylon edging, which is in turn secured by a third seam.

Trekking

Appalachian 55

Appalachian is a byword for strength and reliability which, together with its many pockets and access openings, make it the ideal choice for hikes lasting several days or as baggage on adventure backpacking holidays.

Dundee 70

Dundee is a multi-pocket backpack that is ideal for hiking and travel.

Transalp 75

The Transalp is a reliable, ultra-resistant, and comfortable backpack. It's the ideal companion for trekking or long journeys.

Back Systems

Air Convectector Tech

A super-breathable ergonomic back in mesh fabric. The double-density shaped padding ensures excellent breathability. The back panel is supported by a removable polyethylene panel with internal support for improved load distribution and carrying stability.

Double Ergo Adjustment

An extremely practical and comfortable adjustment system using a shoulder strap slide that runs along a self-modelling double framework in aluminium for better weight distribution in the waist area.

ERGONOMIC CONTOURS
DIFFERENTIATED PAD-
DING ON WAIST BELT

Woman Special Features

We pay a great deal of attention to the different needs of outdoor enthusiasts and that is why we have created our WOMAN line, a range that includes backpacks and sleeping bags especially designed to meet the specific requirements of women users, guaranteeing high performance and maximum comfort.

How to find the perfect size for your backpack with Double Ergo Adjustment

When choosing a backpack, it is essential to find the optimal length for your back. With the right instructions and a little patience, you can achieve the perfect fit. Follow these steps to ensure that the backpack you are buying fits comfortably and securely on your back.

1 Find the two measuring points.

The length of the back is the distance between the seventh vertebra and the top of the hip. It is between these two points that the measurement will be taken. Lean your head slightly forward and place one hand on your hip with your thumb pointing towards the middle of your back and the other fingers pointing forward. You will feel the upper edge of the hip.

2 Use a belt to help you.

Take a belt and place it horizontally on the top of your hips. This will help you keep your spine straight and better reach the middle of your back when measuring.

3 Take measurements with a tape measure.

Start by measuring from the seventh cervical vertebra to the hip with a tape measure. Use your left hand to hold the tape measure on your back and your right hand to reach your waist. Press your thumb on the point where the tape measure meets the belt on your back. Hold this position steady. Look at the measurement on the top of the tape measure. This is your result!

DOUBLE ERGO ADJUSTMENT

Extremely practical and comfortable, the adjustment is made by sliding the shoulder strap slide over a self-moulding aluminium double weave for better load distribution through the waist strap.

Size guide for Ferrino backpacks.

Compare the result of your measurement with the table below to correctly adjust the backpack back to your build.

This type of adjustable backpack is offered in the unisex version and in the women's version.

Fabrics

Jacquard Weave 500D

Ultra-light fabric in high-tenacity DSM Dyneema® fibre.

Double Tech

An extremely lightweight, strong 210D polyester fibre fabric, thanks to its double-row reinforced Ripstop weave.

210D HD Invisible Ripstop

Extremely tough polyester fiber fabric being exceptionally resistant due to its ripstop weave

Supertex®

An extremely hardwearing fabric that is ideal for backpacks that have to withstand repeated stresses over time.

Reinforced Laminated Fabric

Rip- and scratchproof chlorosulphonated polyethylene.

Triple seams

Fabrics are joined together using a double overlapping seam, protected by nylon edging, which is in turn secured by a third seam.

Ferrino Hikemaster Line with Auxetic Technology

AUXETIC

Design project aims

1

To improve thermal and ergonomic comfort for hiking backpack

2

To increase the wellness of users, thanks to the reduction of the metabolic costs of physical activity.

Work team

A three-year partnership between the R&D team at Ferrino, Comfort Lab in Città Studi Biella and the Sport Technology Lab in Bologna (University of Bologna).

Laboratory tests

1 Implementation of laboratory tests in the product development stage to use objective data to assess proposed solution validity.

2 Backpack performance has been tested in a climate chamber under controlled environmental and physical stress conditions to assess a series of physiological parameters that show the metabolic costs of physical activity: temperature, moisture, sweating.

Tests in climate chamber

- The environmental conditions were as follows: air temperature (T_a) $23.4 \pm 0.4^\circ\text{C}$ and relative humidity (RH_a) 47.4 ± 0.8 .
- The tests were performed on ten subjects of opposite sex. Backpacks loaded with 20% of the body weight of the tester, who was then subject to physical activity for 50 minutes.
- Assessment of thermal comfort: temperature and moisture detected using sensors positioned on the tester's body and on the backpack.
- Surface temperature of testers and backpack at the end of the test, using thermographic surveys.
- Weight of testers and backpack before and after activity to assess sweat loss and residual sweat.
- Questionnaire given to testers to survey their subjective feelings and of temperature and moisture.

Solution

Make the shoulder straps on the new line of Hikemaster backpacks in auxetic material

Auxetic materials are characterised by a negative Poisson coefficient, subjected to traction, they tend to expand.

Making shoulder straps in these materials can offer the following advantages:

- Increased breathability
- Increased thermal comfort
- More even load distribution
- + 10% evaporation compared to traditional shoulder straps
- Increased heat expulsion efficiency

+10% evaporation
compared to traditional shoulder straps

Active - Daypacks

X-Dry 15+3

X-Dry 15 is the ideal backpack for trail runners in any climate condition. Rain, mud and sweat cannot damage any of the material in the main body, which is 100% waterproof, thanks to the HDry® system

Zephyr 17+3

Zephyr, the historical all-around backpack for hiking and mountain biking tours, has been redesigned for even better performance.

Connect 22

The ideal backpack for your day-to-day movements or travel. The “roll-up” top closure offers better access to the main compartment and makes it possible to add to volume whenever the situation requires

Back Systems

Breathable Back

Ultra-breathable back, shoulder straps or waist belt using open-cell padding with super-breathable mesh fabric

Hollow Back System

Ultra-breathable back, shoulder straps and waist belt with a combination of pre-formed padding with vent channels and super-breathable mesh fabric.

Dry Net System

Breathability is guaranteed by mesh fabric, while weight distribution and carrying stability are optimised by a framework.

Fabrics

Dyneema®

Ultra-light fabric in high-tenacity DSM Dyneema® fibre.

Nylon 50D Dot Dobby Ripstop

An ultra-light fabric that guarantees excellent resistance to breaking and tearing, thanks to its Ripstop weave.

210D HD Invisible Ripstop

Extremely tough polyester fiber fabric being exceptionally resistant due to its ripstop weave

Diamond HD

210D polyester fibre fabric with high-density weave and an excellent weight/robustness ratio.

Nylon 40D

100D Robic® Nylon Ripstop

High-tenacity nylon ripstop for greater resistance to tearing and abrasion compared to the standard Nylon 6..

Reinforced Laminated Fabric

Rip- and scratchproof chlorosulphonated polyethylene.

Hdry®

The Hdry® waterproofing technology is based on a patented lamination technique, where, thanks to the combined action of pressure and temperature, the waterproof membrane is heat welded inside the backpack.

With the Hdry® system, the membrane is prepared in a 3D shape that, by adapting to the shape of the backpack, adheres to the inner surface, perfectly sealing the seams and any other point where water can enter. This process makes the backpack completely waterproof (10.000 mm water column, even at the seams), and increases the resistance of fabrics guaranteeing improved durability.

Triple seams

Fabrics are joined together using a double overlapping seam, protected by nylon edging, which is in turn secured by a third seam.

YKK zips

Recycled Fabric

You are buying a product made from 100% recycled fabric.

Tents

Extreme 2

The Extreme 2 is an ultra-light tent designed for high-altitude use.

Extreme tent complete with vestibule

Namika 2

2-Person, 4-season tent with minimum weight and compact dimensions. Easy to set up, thanks to the continued external sleeves, closed on one end for easy set-up, even in case of harsh weather conditions, without getting the inner tent wet.

Blow 1

Blow 1 is an ultralight one-person tent. Lightweight, comfy, and easy to set up. Designed to protect trekkers and cyclists wanting to travel and experience adventures with no limits.

Nemesi 2 Pro

Nemesi 2 PRO is an ultra-light 2-person tent that is both reliable and easy to set up. The preformed poles and spacer add to the strength and the living space. Designed to shelter hikers, trekkers, and cyclists who like to go touring.

Join 5

Join 5 is a tent designed for campsite holidays. This tent is designed to sleep 5 campers who need a roomy, accessorised sleeping area, a large vestibule, and two spaces designed for suitcase storage.

P. 114

HighLab

High Lab tents represent the height of Ferrino research and technology. They are the result of tests performed in a laboratory and at high altitudes for the purpose of supplying prompt and leading-edge solutions to professional users who need to face extreme conditions in terms of the elements and the environment.

P. 126

4 Seasons

This is a range designed with attention to even the smallest details and suitable for mountain use. Made using the best materials available, the range has all of the characteristics that make Ferrino quality tents stand out from the rest: resistance to the elements, excellent design, functionality, light weight and fast set-up and taking down.

P. 134

Ultra Light Adventure

A range of ultra-light tents designed for trekking, backcountry, and bikepacking. Light, functional, compact, and easy to carry meaning these tents are perfect for those who don't want to compromise. We can define this line of products as a group of technical features condensed into minimum weight and compact size.

P. 152

Light Adventure

Lightweight tents created for travel. Large and spacious, and designed with a careful eye to comfort and practical use. Easy to set up for quick, safe shelter on any adventure.

P. 166

Outdoor Classic

A line designed for use in mild climate conditions. The special focus is on comfort, easy set-up and maximum ventilation.

P. 174

Family

Large tents designed for those who need a lot of space for comfortable camping over longer periods. Made to guarantee hardwearing strength, good wind resistance and excellent ventilation.

Features

Triple Reinforcement

3 layer construction floor corners reinforcement.

R.B.System

Fly sheet reinforcement system in Oxford 210 D polyester fabric. Works like an harness, to provide higher wind/storm resistance.

Liftable Flap

To get the tent adjusted according to the weather conditions – to get it more closed or open either for a better ventilation or to protect the inner tent in case of bad weather conditions.

Fire Retardant

Fire retardant fabrics comply to the specifications of the CPAI-84 standard.

Tape Adjustment

To attach and regulate the distance of the fly-sheet to the base.

Poles

Tempered 7001 T6 aluminium alloy poles with exceptional characteristics of lightness, resistance and elasticity

Extreme 2: High-strength carbon poles designed and optimised for alpine use by EASTON®

Floor Corner

To fix the tent to snow with ice-axes, skis or other moorings.

Poles-guy Line

Guy lines connected to the poles through the external ventilations sleeves, for a higher stability.

Pegs

All pegs High Lab line are made of aluminium.

*excluding case and pegs

The Extreme 2 is an ultra-light tent designed for high-altitude use.

Weighing in at just 890 g, its aerodynamics tested under extreme conditions in a wind tunnel, and its high-performance materials make it the ideal tent for the most extreme weather conditions.

The internal carbon pole system by Easton® allows for quick and secure assembly even in strong wind, without the risk of losing tent elements.

Structure: Dome

Materials: Floor and Bio-Based Dyneema® Fiber inserts 20,000 mm 25 gm2 | Double roof ECOSENSOR™ 10D Recycled Nylon | PU Membrane waterproof 6000 mm, breathability 30.000 g/m2/24h, 56 gm2 | Taped seams to ensure total waterproofing | Three-layer construction to reinforce the basin corners.

Poles: Easton® carbon poles | 7075 aluminium pegs with a cross-section.

Entrance and ventilation: Front entrance with ventilation window | Hood and ventilation cuffs can be closed from the inside.

Storage: Internal pocket | Removable storage on the tent ridge.

Accessories: Tape loops on the floor corners to anchor the tent with skis, ice axes, or deadman anchors when mounted on snow | "Multi-point" reflective guy lines system prevents breaking and deformation of the poles in case of strong wind | Fluorescent guy line tensioners | 100% waterproof Bio-Based Dyneema® Fiber tent sack with "roll-up" top closure | Repair kit | Video instructions enabled with QR code.

Snowbound 2

99098 DAFR

* fly sheet, inner tent and poles only

Snowbound 2 is the 2 person tent built to provide top performance when it comes to wind resistance, thanks to a system of reinforcements on the perimeter structure (RB) and to its geodesic shape. This tent is the ideal shelter for professionals facing expeditions at high altitudes or on glaciers, in base camps or areas with lots of exposure to wind and extreme weather conditions

Structure: Geodetic

Materials: Fly sheet in 50D, 80 g/m², Polyester Ripstop coated with polyurethane, waterproof to 4.000 mm. Water repellent, with FR treatment | R.B. System: fly sheet with reinforcement band on the perimeter in 210D polyester Oxford that acts as a harness for guaranteed better resistance in case of adverse weather conditions | Inside waterrepellent and breathable 70D, 55 g/m², Polyester Ripstop, with FR treatment | Floor in 70D, 95 g/m², Polyester coated with polyurethane, waterproof to 8.000 mm. Water repellent, with FR treatment | Transparent front window in TPU | Taped seams to guarantee total waterproofing | Threelayer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 4 shockcorded aluminium poles of equal length for easier set up | 1 aluminium veranda pole in a different colour | Inner tent overhung using continuous mesh sleeves | "V shape" aluminium pegs

Entrance and ventilation: 1 vestibule and rear entrance | Fully opening room doors that fold into a special pocket | Ventilation sleeves that can be closed from the inside | Liftable flap on the entrance to the tent for excellent ventilation (when rolled up) or tent protection in case of bad weather (if unrolled)

Storage: Internal storage pockets | Gear loops

Accessories: Adjustable fly sheet distance from the base, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Guy lines to secure the tent connected directly to the poles for maximum stability | Fluorescent guy line pulls | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code | Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings.

Snowbound 3

99099 DAFR

* fly sheet, inner tent and poles only

Snowbound 3 is the 3 person tent built to provide top performance when it comes to wind resistance, thanks to a system of reinforcements on the perimeter structure (RB) and to its geodesic shape. This tent is the ideal shelter for professionals facing expeditions at high altitudes or on glaciers, in base camps or areas with lots of exposure to wind and extreme weather conditions

Structure: Geodetic

Materials: Fly sheet in 50D, 80 g/m², Polyester Ripstop coated with polyurethane, waterproof to 4.000 mm. Water repellent, with FR treatment | R.B. System: fly sheet with reinforcement band on the perimeter in 210D polyester Oxford that acts as a harness for guaranteed better resistance in case of adverse weather conditions | Inside waterrepellent and breathable 70D, 55 g/m², Polyester Ripstop, with FR treatment | Floor in 70D, 95 g/m², Polyester coated with polyurethane, waterproof to 8.000 mm. Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 4 shockcorded aluminium poles of equal length for easier set up | 1 aluminium veranda pole in a different colour | Inner tent overhung using continuous mesh sleeves | "V shape" aluminium pegs

Entrance and ventilation: 2 vestibules | Fully opening room doors that fold into a special pocket | Ventilation sleeves and outlets that close from the inside | Liftable flap on the entrance to the tent for excellent ventilation (when rolled up) or tent protection in case of bad weather (if unrolled)

Storage: Internal storage pockets | Gear loops

Accessories: Adjustable fly sheet distance from the base, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Guy lines to secure the tent connected directly to the poles for maximum stability | Fluorescent guy line pulls | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code | Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings.

Pilier 2

99068 LAAFR

* fly sheet, inner tent and poles only

Pilier 2 is the perfect tent for use at high altitudes with maximum performance in terms of wind resistance. The system of external poles means that set-up is quick in cases of bad weather and prevents the inner tent from getting wet.

Structure: Geodetic

Materials: Fly sheet in 50D Polyester Ripstop, 80 g/m², with polyurethane coating, waterproof to 4000 mm. Water repellent and FR treated. | Inner tent Water-repellent and breathable 70D Polyester Ripstop, 55 g/m², with FR treatment. | Floor 70D, 95 g/m² polyester, coated with polyurethane, waterproof to 8,000 mm, water repellent and FR treated | Clear window in TPU | Taped seams to guarantee total waterproofing | Three-layer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 3 poles in shock-corded aluminium in different co-

lours for easier set up | Inner tent hung from the fly-sheet using elastic tapes, rings and toggles | "V shape" aluminium pegs

Entrance and ventilation: Front vestibule | Room door with mosquito net exterior that opens out fully and folds into a special pocket | Ventilation sleeves that can be closed from the inside

Storage: Internal storage pockets and loops | "Ambient light" light diffuser pockets | Removable storage on the ridge, inside the tent

Accessories: System to fasten the fly-sheet to the inner tent with aluminium buckles for optimum tensioning between the two parts. | Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings. | Multipoint guy line system to prevent the breakage or deformation of poles in strong winds | Fluorescent guy line pulls | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code

Pilier 3

91163 LAAFR

* fly sheet, inner tent and poles only

Pilier 3 is a 3 person tent built to withstand the harsh climate conditions at high altitude

Structure: Geodetic

Materials: Fly sheet in 50D, 80 g/m², Polyester Ripstop coated with polyurethane, waterproof to 4.000 mm. Water repellent, with FR treatment | Inside waterrepellent and breathable 70D Polyester Ripstop, with FR treatment | Floor in 70D, 55 g/m², Polyester coated with polyurethane, waterproof to 8.000 mm. Water repellent, with FR treatment | Transparent front window in TPU | Taped seams to guarantee total waterproofing | Three layer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 3 poles in shockcorded aluminium in different co-

lours for easier set up | Inner tent hung from poles with continuous mesh sleeves | "V shape" aluminium pegs

Entrance and ventilation: Front vestibule that rolls up fully | Rear vestibule | Room door with mosquito net exterior that opens out fully and folds into a special pocket | Ventilation sleeves that can be closed from the inside

Accessories: Adjustable fly sheet distance from the base, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings. | Storm guy lines | Fluorescent guy line pulls | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code

Campo Base

90130 LAA

Campo Base is an extremely versatile expedition tent that is perfect as a base camp, mess tent, or as a support for logistics. The removable inner tent means it is also perfect for sleeping quarters.

Structure: Geodetic

Materials: Fly sheet in thermal insulating, aluminised 210D Polyester Oxford, waterproof to 4,000 mm, water resistant, fireproof to CPAI 84 standard | Inner tent in water-repellent, breathable 70D Polyester, fireproof to CPAI 84 standard | Fully welded inner tent floor in Polyethylene, waterproof to 10,000 mm, water resistant and fireproof to CPAI 84 standard | Fully welded additional floor in Polyethylene, waterproof to 10,000 mm, water resistant and fireproof to CPAI 84 standard | Taped seams in the fly-sheet to guarantee total waterproofing

Poles: Poles in 7001 T6 tempered aluminium alloy for light weight, strength and elasticity | 4 shock-corded aluminium poles, diameter 13 mm, all the same length for easier setup | 2 inner tent ridge poles in shock-corded aluminium, diameter 8.5 mm

and the same length for easier setup | 2 steel poles for vestibule | Reinforced steel pegs, 25 cm long and 2 mm thick

Entrance and ventilation: Front vestibule door with window and side rain protections that roll up completely | Rear entrance | Ventilation sleeves | Liftable snow flap for excellent ventilation (when rolled up) or protection in case of bad weather (if unrolled) | Inner tent doors and windows with outer mosquito net and fully closable inner cover.

Storage: Internal storage pockets | Gear loops

Accessories: Multipoint guy line system to secure the tent and provide greater structural resistance in case of strong winds | Tape to adjust the distance from fly-sheet to base, for excellent tensioning and to allow more or less air to enter, based on the climate and weather conditions | Tape loops on the corners of the fly-sheet to secure the tent, if set up on snow, with ice axes, skis or other anchorages | Reinforced stuff sack in polyethylene with compression straps and double carry handle | Reinforced polyethylene bag for poles and pegs | Repair kit | Set up instruction video activated by QR Code.

Colle Sud

99094 W

* fly sheet, inner tent and poles only

Colle Sud is an expedition tent with stable, robust geodesic structure. Can sleep up to 6 people.

Structure: Geodesic

Materials: Fly sheet in aluminised polyester Oxford, Water Resistant to 4.000 mm | Inner tent in waterrepellent, breathable nylon Ripstop | Aluminised polyester Oxford floor, Water Resistant to 4.000 mm | Taped seams to guarantee total waterproofing

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong

and elastic | 7 shockcorded duraluminium poles, diameter 13 mm | Different coloured poles for easier set up | Inner tent overhung using continuous mesh sleeves | Aluminium pegs

Entrance and ventilation: Double entrance | Ventilation sleeves and outlets | Auxiliary vents | Lifiable snow flap

Storage: Inside pockets

Accessories: Guy lines to secure the tent connected directly to the poles for maximum stability | Stuff sack for tent included | Repair kit included

Features

Triple Reinforcement

3 layer construction floor corners reinforcement.

Fire Retardant

Fire retardant fabrics comply to the specifications of the CPAI-84 standard.

Liftable Flap

To get the tent adjusted according to the weather conditions – to get it more closed or open either for a better ventilation or to protect the inner tent in case of bad weather conditions.

Poles

Tempered 7001 T6 aluminium alloy poles with exceptional characteristics of lightness, resistance and elasticity

Tape Adjustment

To attach and regulate the distance of the fly-sheet to the base.

Ventilation Outlets

Storm proof ventilation outlets

Guy Ropes System

Multipoint guy rope system that prevents poles from bending and breaking in case of strong winds.

Floor Corner

To fix the tent to snow with ice-axes, skis or other moorings.

Recycled Fabric

You are buying a product made from 100% recycled fabric.

Namika 2

99064 NAAFR

* fly sheet, inner tent and poles only

2-Person, 4-season tent with minimum weight and compact dimensions.

Easy to set up, thanks to the continued external sleeves, closed on one end for easy set-up, even in case of harsh weather conditions, without getting the inner tent wet.

Structure: Dome

Materials: Fly-sheet in 100% Recycled 70D Polyester Ripstop, 85 g/m², coated with aluminised, heat-insulating polyurethane, waterproof to 3000 mm, with FR treatment | Inner tent in 70D Polyester Ripstop, 55 g/m², water-repellent and breathable, with FR treatment | Floor in 100% Recycled 70D Polyester, 95 g/m², coated with heat-insulating polyurethane, waterproof to 8,000 mm, with FR treatment | Front window in clear TPU | Taped seams in fly-sheet and floor | Three-layer construction to reinforce the floor corners.

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 3 shock-corded duraluminium poles in different colours for easier set up | External poles | Inner tent hung from fly-sheet with tapes, loops and toggles | "Y-Peg" aluminium pegs

Entrance and ventilation: Front vestibule | Door with exterior mosquito net that opens out fully and folds into a special pocket | Ventilation sleeves with stormproof system.

Storage: Internal storage pockets and gear loops

Accessories: Tape loops in floor corners to secure the tent, if set up on snow, with ice-axes, skis or other dead weights | Reflective storm guy-lines | Lamp hook | Stuff sack | Repair kit included | Instruction video activated with QR code.

Manaslu 2

99070 LAAFR

* fly sheet, inner tent and poles only

Manaslu 2 is the 4 season, 2 person tent for all those seeking space, minimum weight, easy set up and top performance in terms of reliability, thanks to the duraluminium structure with radial joints.

Structure: Tunnel

Materials: Fly sheet in 100% Recycled Polyester Ripstop 70D, 85 g/m², polyurethane coating, aluminised and thermal insulating, waterproof to 3.000 mm, water repellent with FR treatment | Inner tent in Polyester Ripstop 70D, 55 g/m², water repellent and breathable with FR treatment | Floor in 100% Recycled Polyester 70D, 95 g/m², thermal insulating polyurethane coating, waterproof to 8.000 mm, water repellent with FR treatment | Front window in transparent TPU | Taped seams in flysheet and floor | Three layer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | Loadbearing structure with shockcorded duraluminium poles and radial joints | Inner tent hung from poles with hooks and sleeves | "Y-Peg" aluminium pegs

Entrance and ventilation: Front vestibule | Door with mosquito net exterior that opens out fully and folds into a special pocket | Ventilation sleeves | Lifiable snow flap on base perimeter of the tent for excellent ventilation (when rolled up) or tent protection in case of bad weather (if unrolled)

Storage: Internal storage pockets and gear loops

Accessories: Tape adjustment for the fly sheet, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Reflective storm guy lines | Lamp hook | Stuff sack | Repair kit | Instruction video activated with QR code

Trivor 2

99058 LAAFR

All-season tent with external pole system that makes fast set-up possible without getting the room wet, even in harsh weather conditions.

Structure: Dome

Materials: Fly sheet in 100 % Recycled 70D Polyester Ripstop, 85 g/m² coated with thermal insulated, aluminised polyurethane, and waterproof to 3.000 mm. Water repellent, with FR treatment | Inside in water repellent and breathable 70D Polyester Ripstop, 55 g/ m², with FR treatment | Floor in 100 % Recycled 70D, 95 g/m² polyester, coated with thermal insulated polyurethane, waterproof to 8.000 mm. Water repellent, with FR treatment | Windows in clear TPU | Taped seams in fly-sheet and floor | Three-layer construction to reinforce the floor corners

Poles: 3 poles in shock-corded duraluminium in different colours for easier set up | External poles | Inner tent hung from the fly-sheet using tapes, rings and toggles | "Y-Peg" aluminium pegs

Entrance and ventilation: Two vestibules | Fully opening doors with mosquito net exterior that fold into a special pocket | Ventilation sleeves with stormproof system

Storage: Internal storage pockets and gear loops

Accessories: Multipoint guy line system to prevent the breakage or deformation of poles in strong winds | Reflective guy lines | Lamp hook | Stuff sack | Repair kit | Instruction video activated with QR code

Svalbard 3.0

99056 LAAFR

* fly sheet, inner tent and poles only

Svalbard 3.0 is the 4 season tent that best embodies Ferrino's spirit of adventure; a trusty companion in terms of reliability and versatility, and excellent in all 4 seasons in the mountains or anywhere else that trekkers and climbers decide to take it.

Structure: Double cross

Materials: Fly sheet in 100% Recycled Polyester Ripstop 70D, 85 g/m², coated with aluminised and thermal insulating polyurethane, waterproof to 3.000 mm., water repellent with FR treatment | Inner tent in water repellent and breathable Polyester Ripstop 70D, 55 g/ m² with FR treatment | Floor in Polyester Oxford 210D, 130 g/ m², coated with thermal insulating polyurethane, waterproof to 8.000 mm., water repellent with FR treatment | Taped seams in fly sheet and floor to guarantee waterproofing | Three layer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 3 shockcorded duraluminium poles | Different coloured poles for easier set up | Inner tent hung from poles with

pole guide sleeves| "Y-Peg" aluminium pegs

Entrance and ventilation: Vestibules to protect the two entrances, front and back with extra room for bulky equipment | Fully opening doors with mosquito net exterior, which fold into a special pocket | Stormproof ventilation sleeves | Liftable snow flap on base perimeter of the tent for excellent ventilation (when rolled up) or tent protection in case of bad weather (if unrolled)

Storage: Internal storage pockets

Accessories: Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings. | Adjustable fly sheet distance from the base for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Reflective multipoint guy line system to prevent the breakage or deformation of poles in strong winds | Internal lamp hook | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code

Lhotse 4

99069 LAAFR

* fly sheet, inner tent and poles only

Lhotse 4 is the 4 person tent that is ideal for base camp use. A shelter that offers maximum comfort and room, together with robustness, ventilation and heat insulation.

Structure: Dome

Materials: Fly sheet in 100 % Recycled Polyester Ripstop 70D, 85 g/m², polyurethane coating, aluminised and thermal insulating, waterproof to 3.000 mm, water repellent with FR treatment | Inner tent in Polyester Ripstop 70D, 55 g/m², water repellent and breathable with FR treatment | Floor in 100 % Recycled Polyester 70D, 95 g/m², thermal insulating polyurethane coating, waterproof to 8.000 mm, water repellent with FR treatment | Transparent TPU windows | Taped seams in fly sheet and floor to guarantee waterproofing | Threelayer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong

and elastic | 3 poles in shockcorded duraluminium in different colours for easier set up | Inner tent hung from poles with hooks and sleeves for easy set up | "Y-Peg" aluminium pegs

Entrance and ventilation: Two vestibules | Fully opening doors with mosquito net exterior, which fold into a special pocket | Ventilation sleeves | Liftable snow flap on base perimeter of the tent for excellent ventilation (when rolled up) or tent protection in case of bad weather (if unrolled)

Storage: Internal storage pockets | Gear loops | Removable storage on the inside ridge of the inner tent

Accessories: Multipoint guy line system to prevent the breakage or deformation of poles in strong winds | Tape adjustment for the fly sheet base, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Lamp hook | Stuff sack | Repair kit | Instruction video activated with QR code

Features

Fast Adjustment

F.A. "Fast Adjustment" system for guy ropes.

Tape Adjustment

To attach and regulate the distance of the fly-sheet to the base.

Poles

Tempered 7001 T6 aluminium alloy poles with exceptional characteristics of lightness, resistance and elasticity

Triple Reinforcement

3 layer construction floor corners reinforcement.

PRE-ASSEMBLED INNER TENT.
POSSIBILITY TO SET UP FLY-SHEET WITHOUT INNER TENT.

Piuma 1

91214 OOB

* fly sheet, inner tent and poles only

The ultralight Piuma1 tent is developed for trekkers, bikepackers, backcountry and ultralights trips.

The focus of the Piuma tent is to provide a good interior volume without suffering any penalty regarding functionality and weight.

The full access to the apsis is enhanced by a zippered small door positioned on the head of the room that allows one to reach the narrowest front apsis part, without opening the room door.

Structure: Tunnel

Materials: Fly-sheet in NYLON RIPSTOP 20D Silicone 2000 mm W/R | Mosquito net interior in Nylon 10/0.8 mm | Floor in NYLON RIPSTOP 30D Silicone 3000 mm W/R | Taped seams in fly-sheet and floor to guarantee total waterproofing | Three-layer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy with the characteristics of light weight, strength, and elasticity | 2 shock-corded poles in duraluminium | Superlight aluminium pegs.

Entrance and ventilation: Vestibule | Mosquito net door | Front and rear ventilation sleeve

Storage: Internal storage pockets | Mosquito net opening for vestibule access

Accessories: "Fast Adjustment" guy lines | Gear loops | 100% waterproof stuff sack with taped seams and aquastop fastening | Repair kit included | Instruction video activated with QR code

Entrance and ventilation: Vestibule | Mosquito net door | Ventilation sleeves | "Camera Air" ventilation system and large mosquito net

Storage: Internal storage pockets

Accessories: Adjustable fly sheet distance from the base using aluminium buckles, for optimum tensioning and more or less ventilation, as needed according to weather conditions and climate | Storm guy lines. | Internal lamp hook | Stuff sack | Repair kit | Instruction video activated with QR code

MTB

99031 MBB

* fly sheet and poles only

MTB is the 3 season, 2 person tent specifically designed for cycle tourists and bikers, and for those who during the warmer seasons.

Structure: Half Dome

Materials: Fly sheet in Polyester Honey 70D, 75 g/m², polyurethane coating, thermal insulating, waterproof to 2000 mm, water repellent | Floor in Polyester 70D, 85 g/m², polyurethane coating, thermal insulating and waterproof to 2500 mm, water repellent | Taped seams in fly sheet and floor to guarantee waterproofing | Three layer construction to reinforce the floor corners

Poles: 1 shock corded fibreglass pole | Aluminium pegs

Entrance and ventilation: Front and rear door in with mosquito net | Rear ventilation

Storage: Internal storage pockets

Accessories: Lamp hook | Stuff sack | Repair kit | Instruction video activated with QR code

Sintesi 1

91174 HOOFR

* fly sheet and poles only

Sintesi 1 is the ultralight, singlewall, and basic 1 person tent: less than a kilo (830 g minimum weight) for a minimal, shelter on your biking or walking travels.

Structure: Tunnel

Materials: Fly sheet in Polyester Ripstop 50D, 60 g/m², polyurethane coating, waterproof to 3.000 mm, water repellent, with FR treatment | Floor in Polyester 50D, 60 g/m², polyurethane coating, waterproof to 8.000 mm, water repellent, with FR treatment | Taped seams in flysheet and floor to guarantee total waterproofing | Three layer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | Poles in shockcorded duraluminium in different colours for easier set up | External poles | "Hexagon" aluminium pegs

Entrance and ventilation: Vestibule | Mosquito net door | Front ventilation

Storage: Internal storage pockets

Accessories: "Fast Adjustment" guy lines | Lamp hook | Stuff sack included | Repair kit included | Instruction video activated with QR code

Sintesi 2

91175 HOOFR

* fly sheet and poles only

Sintesi 2 is the ultralight, basic, singlewall, 1 person tent weighing less than one and a half kilos (1.4 kg minimum weight) for a minimal, technical shelter on your biking or walking travels.

Structure: Half Dome

Materials: Fly sheet in Polyester Ripstop 50D, 60 g/m², polyurethane coating, waterproof to 3.000 mm., water repellent, with FR treatment | Floor in Polyester 50D, 60 g/m², polyurethane coating, waterproof to 8.000 mm., water repellent, with FR treatment | Taped seams in flysheet and floor to guarantee total waterproofing | Three layer construction to reinforce

the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 1 pole in shockcorded duraluminium for easier set up | External poles | "Hexagon" aluminium pegs

Entrance and ventilation: Vestibule | Mosquito net door | Ventilation sleeves

Storage: Internal storage pockets

Accessories: "Fast Adjustment" guy lines | Lamp hook | Stuff sack included | Repair kit included | Instruction video activated with QR code

Grit 1

91210 MOOFR

* fly sheet, inner tent and poles only

Ultra-light, essential 1-person tent. The mixed, single-canvas model with large mosquito net inserts make it an excellent shelter during light backpacking or cycling activities.

Structure: ·Dome

Materials: Fly-sheet in 100% Recycled 70D Polyester Ripstop, 85 g/m², coated with polyurethane and waterproof to 3000 mm. Water repellent. FR treatment | Mosquito net inner with FR treatment | Floor in 100% Recycled 70D Polyester, 95 g/m², coated with polyurethane, waterproof to 8,000 mm, with FR treatment | Taped seams in fly-sheet and floor to guarantee total waterproofing | Three-layer construction to reinforce the floor corners

Poles: Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 2 shock-corded duraluminium poles | External poles | Superlight aluminium pegs

Entrance and ventilation: Vestibules | Mosquito net door | Front ventilation sleeves | "Air camera" ventilation system with mosquito net

Storage: Internal storage pockets

Accessories: Storm guy-line system | Lamp hook | Stuff sack included | Repair kit included | Instruction video activated with QR code

Wanderer trunk tent

92016 QSS

The Wanderer tent is a self-inflating awning designed for minivans, family cars, and people carriers.

The tent connects straight to the rear door of the vehicle, increasing the living space by 7,5 m².

A compressor to inflate the structure is built into the inside of the tent itself. The compressor can be charged using a USB C socket.

Three large doors, with mosquito net provide access to the inside of the tent.

Tent-compatible car/van measurements:

Height: 1595 mm / 1990 mm

Width: 1796 mm / 1905 mm

Height with hatch open: 2030 / 2300 mm

Structure: Dome

Materials: Fly-sheet in 70D Diamond polyester, 75 g/m² coated with thermal-insulated, aluminised polyurethane, and waterproof

to 2000 mm. | Fully sealed waterproof floor in polyethylene, waterproof >10.000 mm | Taped seams in fly-sheet and heat-welded seams in the floor for total waterproofing

Poles: 2 independent, shock-corded inflatable elements for improved living space | Electric inflation system for the inflatable elements | Steel pegs

Entrance and ventilation: 3 entrances: one front and two side | Entrance doors with internal mosquito net, complete with eye-lets for the insertion of veranda poles (not supplied) | Connecting tunnel for a height from 190 to 230 cm with system of tapes / suction cups and adjustment buckles for excellent securing to the vehicle.

Storage: Daisy chains for gear / lamp holder.

Accessories: Multi-point guy-line system to secure the tent for improved structural resistance in case of strong winds | Large stuff sack in Supertex | Repair kit, including pump for manual inflation | Instruction video for setup activated by QRCode

NEW

Join 5

92015 QSS

Join 5 is a tent designed for campsite holidays. This tent is designed to sleep 5 campers who need a roomy, accessorised sleeping area, a large vestibule, and two spaces designed for suitcase storage.

Join 5 offers quick and easy setup and is therefore, an excellent choice for a camping holiday with family or friends.

Structure: Tunnel

Materials: Fly-sheet in 70D Diamond polyester, 75 g/m² coated with thermal-insulated, aluminised polyurethane, and waterproof to 2000 mm. | Inner tent in breathable, water-repellent Polyester | Inner tent floor in 70D polyester, 80 g/m², waterproof to 2500 mm. | Fly-sheet floor in fully welded waterproof polyethylene, waterproof to >10,000 mm | Taped seams in fly-sheet and inner tent floor for total waterproofing | Three-layer construction to reinforce the floor corners

Poles: 3 identical shock-corded fibreglass poles | Easy setup with continued external sleeves, closed on one end | External

poles | Inner tent hung from poles with tapes and toggles | Steel pegs

Entrance and ventilation: Large front vestibule | Ventilation sleeves and windows | Front, side and rear entrances | "Air Ventilation System" with large mosquito net | Top air intake in the vestibule and windows to ventilate the tent | Side door in fly-sheet with interior mosquito net

Storage: Removable storage pockets in the living area | Daisy chains for gear | Storage pockets in the sleeping area | Rear storage compartments for gear with access from the sleeping area.

Accessories: Adjustable distance between fly-sheet and base for excellent tensioning | Floor on front, side and rear door opening | Eyelets in fly-sheet door for the insertion of veranda poles (not supplied) | Sleeping area with removable partition | Double system for ducting power cables on fly-sheet and sleeping area | Multi-point guy-line system to secure the tent for better structural resistance in case of strong winds | Internal lamp hook | Large stuff sack in Supertex | Repair kit | Instruction video for setup activated by QRCode

Altair 5

92169 IWW

Family tent with pre-formed inflatable pneumatic structure in place of the traditional poles for improved comfort . This system, together with the comfort of the pre-assembled inner tent, offers quick and easy set-up using the air pump (included).

Structure: Tunnel

Materials: Fly-sheet in 210D Oxford polyester, 130 g/m² coated with thermal-insulated, aluminised polyurethane, and waterproof to 2.500 mm. Water repellent. | Inner tent in water-repellent, breathable polyester | Inner tent floor in 70D polyester, 80 g/m², waterproof to 2.500 mm. Water repellent | Fly sheet floor in fully welded waterproof polyethylene. Waterproof to >10.000 mm | Taped seams to guarantee total waterproofing | Three-layer construction to reinforce the floor corners

Poles: 3 independent, pre-formed and air-filled elements for greater comfort | 1 air-filled element for side veranda | 1 pre-for-

med steel pole for additional canopy | Inner tent secured to the fly-sheet using tapes and adjustment buckles | Steel pegs

Entrance and ventilation: Large front vestibule | Front, side and rear | Sleeping area doors with exterior mosquito net | Front, side and rear door in fly sheet with interior mosquito net | "Air Ventilation System" with large mosquito net; air intakes and windows to ventilate the tent | Transparent window with shade in fly-sheet | Transparent windows in the additional canopies

Storage: Internal storage pockets

Accessories: Removable front canopy | Air pump for inflation included | Adjustable fly-sheet distance from base, for excellent tensioning. | Floor on opening front door | Sleeping area with partition | Specific opening in fly-sheet to duct electrical cables | Multi-point guy-line system to secure the tent, for improved structural resistance in case of strong winds | Large stuff sack in Supertex | Repair kit included | Internal lamp hook | Instruction video for set up with QR code activation

Chanty 5 Deluxe

92162 CWW

Chanty 5 Deluxe is the 5 person family tent that is comfy, roomy, hardwearing and complete with lots of features for campsite holidays.

Structure: Tunnel

Materials: Flysheet in 70D Diamond polyester, 75 g/m² coated with thermalinsulated, aluminised polyurethane, and waterproof to 2.000 mm. | Inner tent in waterrepellent, breathable Diamond polyester | Inner tent floor in 70D, 80 g/m² polyester, waterproof to 2.500 mm. | Fly sheet floor in waterproof, fully welded polyethylene, waterproof >10.000 mm | Inner tent hung from exterior poles with buckles | Taped seams in flysheet and inner tent floor | Three-layer construction to reinforce the floor corners

Poles: 3 shockcorded, preformed fibreglass poles for superior li-

ving space | External poles | Steel pegs

Entrance and ventilation: Front, side and rear entrance | Large front vestibule | Ventilation sleeves and windows | Room doors with exterior mosquito net ("Air ventilation System") | Roof doors with internal mosquito net ("Air ventilation System")

Storage: Internal storage pockets

Accessories: Multipoint guyline system to secure the tent, for improved structural resistance in case of strong winds | Adjustable fly sheet distance from the base for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Internal lamp hook | Supertex stuff sack for tent included | Repair kit included | Instruction video for set up with QR code activation

Fenix 4

91192 MBB

Roomy and comfortable 4-person tent with large front vestibule to make it ideal for campsite holidays. To add to the living space, it can also be combined with the 4-person canopy (Art. 91220MDD).

Structure: Tunnel

Materials: Fly-sheet in 70D Polyester Honey, 75 g/m² coated with thermal-insulated, aluminised polyurethane, and waterproof of 2000 mm | Inner tent in water-repellent, breathable polyester | Inner tent floor in 70D polyester, 80 g/m², waterproof to 2500 mm Fly-sheet floor in waterproof polyethylene fully welded and waterproof to > 10,000 mm | Taped seams in fly-sheet and inner tent floor for total waterproofing | Three-layer construction to reinforce the floor corners

Poles: 3 identical shock-corded poles in fibreglass | External poles | Inner tent hung from poles with tapes and toggles | Steel pegs

Entrance and ventilation: Large front vestibule | Ventilation sleeves and windows | Front, side and rear entrance | "Air Ventilation System" with large mosquito net; air intakes and windows to air the tent | Front and side door in fly-sheet with inside mosquito net | Clear windows in the front of the fly-sheet

Storage: Internal storage pockets

Accessories: Adjustable distance between fly-sheet and base, for optimum tensioning | Floor on opening front door | Sleeping area with removable partition | Opening in fly-sheet to duct power cables | Multi-point guy-line system to secure the tent, for better structural resistance in case of strong winds | Internal lamp hook | Large stuff sack in Supertex | Repair kit | Instruction video for set up, with QR code activation

Fenix 6

91194 MBB

Fenix 6 is a roomy and comfortable family tent with large front vestibule to make it ideal for campsite holidays. To add to the living space, it can also be combined with the 6-person canopy (Art. 91222MDD).

Structure: Tunnel

Materials: Fly-sheet in 70D Polyester Honey, 75 g/m² coated with thermal-insulated, aluminised polyurethane, and waterproof to 2000 mm | Inner tent in water-repellent, breathable polyester | Inner tent floor in 70D polyester, 80 g/m², waterproof to 2500 mm Fly sheet floor in waterproof polyethylene, fully welded and waterproof to > 10,000 mm | Taped seams in fly-sheet and inner tent floor for total waterproofing | Three-layer construction to reinforce the floor corners

Sleeping bags

HighLab

HL Mystic

HL Mystic is the microfibre sleeping bag with top-of-the-range heat insulation performance and light weight. Ideal for mountaineering activities.

HL Revolution

HL Revolution 1200 is the ideal sleeping bag for those wishing to rest during expeditions under extreme weather conditions, since it offers thermal insulation up to -47°C and comfort close to -23°C (man).

We use the EN ISO 23537-1:2022

All of our sleeping bags are tested to the European EN13537 standard and the subsequent EN ISO 23537-1:2022, by an independent textile research body. A special mannequin, fitted with sensors, is

inserted into the sleeping bag and identifies the optimum user temperature according to the temperature of the environment.

WARNING: In the risk range, a strong sensation of cold must be expected.
There is a risk of health damage by hypothermia.

Definition of comfort and extreme values

Comfort temperature

This is the temperature level (referred to a standard woman) at which it is possible to sleep all night in a relaxed position.

Lower comfort limit

Is the minimum temperature (referred to a standard adult man at which it is possible to sleep in a curled up position, without waking, for eight hours.

Extreme temperature

This is the minimum temperature at which the sleeping bag protects the user (standard adult woman) against hypothermia. It allows six hours of uncomfortable sleep without the internal temperature dropping to a dangerous level.

When you choose your sleeping bag, we suggest that you consider comfort and intermediate temperatures, according to your level of physical fitness. When we feel hot or cold, it is caused by our body producing greater or smaller amounts of heat compared to what we are losing to the surrounding environment.

Features

Offset Seams

To prevent heat dispersion, the seams between the inner and outer layers are never communicating.

Shingle Construction

"Shingle" tile construction Better heat insulation in the same size.

Filling

Ferrino & C. spa is RDS certified
 Certified by ICEA
 ICEA-TX- 609
 "Only the products which carry
 the RDS label and claim are certified"

Responsible Down Standard (RDS)

The Responsible Down Standard (RDS) (independently) certifies down and feathers against animal welfare requirements and tracks it from farm to final product.

Tracking: Every stage in the supply chain must be managed in such a way that certified products cannot be confused and/or replaced with others. It allows the end customer to view the names of certified companies on the R.D.S. website. Ferrino will also be on this list.

Extradown

The Extradown filling consists of goose feathers and down (with maximum heat power).

Nixwax® treatment

Traditional untreated down is not water-resistant and absorbs water, loses its softness, and its insulating capacity.

The down with Nikwax DWR treatment resists moisture while maintaining the down's insulating properties and breathability.

- Absorbs 90% less water and dries 3 times faster than untreated conventional down.
- Extends the life of the down
- It is safe for you and the environment as it does not contain PFCs or other harmful chemicals.

Microfiber

A combination of 2D and 3D micro fibres to offer an excellent softness that is comparable only to down. Excellent resilience together with thermal efficiency make this one of the most cutting-edge manmade fibres. It also maintains its thermal capacity when damp or compressed.

Fabrics

20D 380T Nylon

For those who want the utmost comfort and at the same time, extreme resistance. Particularly suited as a liner fabric for top-performance sleeping bags.

Nylon 30D 184T mini ripstop

The hand and light weight of the fabric bring out the best qualities of the products on which they are used! Its fibre-proof characteristics guarantee the life-long durability of your sleeping bag.

Nylon 10D Ripstop recycled

An ultra-lightweight recycled downproof fabric that combines excellent resistance with extraordinary breathability. Particularly suitable for the outer and inner fabrics of the sleeping bag.

Features: Minimum heat loss, thanks to the staggered seams | Easier opening with the "One Touch" system | 3D shape in the foot area for improved comfort (except for Art. 86699 500 Duvet) | "2-way" zipper on the sides and zipper in the foot area | Cold protection hood | Zip baffle | Outside storage pocket | Stuff sack included

Lighttec Duvet 500: Extremely light and compact. Can be used as a liner together with a warmer sleeping bag for improved cold protection. Our tests show that it increases heat insulation comfort values by 7-8°C.

Features: Easy "one touch" opening system | Outside storage pocket | Stuff sack

Synthetic Filling

Nightec

The ideal sleeping bags for 4-season use. The Micro fibre manmade filling and Dual-zip system guarantees maximum thermal efficiency.

Lightec SM 1100

These sleeping bags with extremely reduced size and weight offer excellent heat performance thanks to the "shingle" construction.

Features

Offset Seams

To prevent heat dispersion, the seams between the inner and outer layers are never communicating.

Shingle Construction

"Shingle" tile construction Better heat insulation in the same size.

Filling

High Thermal Fiber Compact®

A fibre that combines great strength with excellent weightlessness. This particularly compact fibre has been designed to guarantee excellent heat insulation while preserving its original form over time. Its three constituent fibres guarantee exceptional compressibility and softness. Washable, odourless, anallergic and free from chemical additives.

High Thermal Fiber Performance®

A highly thermal fibre that limits heat dispersion thanks to the hollows in its fibres. An insulating material of the highest quality, developed as the ideal solution for particularly harsh climates and weather conditions. It is created from two hollow fibres of different thickness, which trap air without heat dispersion. Washable, odourless, anallergic and free from chemical additives.

Microfiber

A combination of 2D and 3D micro fibres to offer an excellent softness that is comparable only to down. Excellent resilience together with thermal efficiency make this one of the most cutting-edge manmade fibres. It also maintains its thermal capacity when damp or compressed.

Fabric

35% Cotton - 65% Polyester

The dense weave prevents feather loss.

190T Polyester

Strong polyester fibre that provides excellent resistance to UV rays.

210T Dobby 70D Ristop Polyester

The polyester fibre offers excellent resistance to UV rays, while the Ripstop weave gives it the capacity to resist against tearing.

Pongee 240T Polyester

Its softness makes it especially suited to the inside of the sleeping bag. It is also hardwearing and stands out for its lightness and breathability.

66D 190T recycled polyester

Recycled fabric made using post-consumer plastic bottles and old clothing. The polyester fibre offers excellent resistance to U.V. rays.

Nylon 20D 400T

The feel and extremely light weight of this fabric brings out the full quality of products where it is used. Its fireproof characteristics are a guarantee of a long-lasting sleeping bag.

Recycled polyester 30D 360T ripstop

Recycled fabric with excellent resistance, light weight and breathability. Particularly recommended for sleeping bag shells

Travel 200

86320 HBB

Sleeping bags that open out fully and combine to be used as blankets. "H4 fibre" filling which, compared to a traditional polyester filling, offers excellent insulating performance while reducing filling weight by approximately 40%. Travel 200 is a multipurpose sleeping bag for traditional camping or travel use, and it also opens out fully into a blanket.

Shell: 35% Cotton | 65% Polyester

Liner: 100% Cotton/Flannel

Filling: 800 g H4 Fibre

Features: H4 Fibre filling: excellent insulation, and a weight saving of around 40% compared to traditional polyester | Opens out into a blanket | Joinable

Colibri

86099 CBB

Colibri is an ultra-light sleeping bag that is ideal for camping during the summer months, as a refuge bag, or as a liner inside other bags.

Shell: Polyester Ripstop

Liner: Polycotton, soft on the skin

Intermediate thermal layer: aluminised coating

Rider Pro

86369 DVV

Rider Pro is the thermal cover and survival bag, with aluminised insulating coating and waterproof tapes.

Fabric: Polyester ripstop and aluminised insulation coating (thermal)

Waterproof: taped seams

Two zippers: Central and foot area

Silk Liner

Pure silk sleeping bag liner which ensures unique thermal comfort. This ultra light and space saving silk liner is the ideal solution for the most demanding users.

Compression sack to reduce sleeping bag size to a minimum during transport. Made in 210 T Nylon.

We use the ASTM F3340-18/ 2020

All of our tested air mattresses undergo the procedures required in the ASTM F3340-18/ 2020 standard, by an independent textile research laboratory. Measurement of thermal resistance of the air mattress (known as the R value) includes placing the sample between a hot plate (simulating the user's body heat) and a cold plate (simulating the temperature of the floor) and measu-

ring the heat exchange. The higher the heat transferred from the hot plate to the cold one through the sample, the lower the thermal resistance. A higher R coefficient value (**R value**), means better insulation.

Air mattresses with values between 0 and 1.9 are recommended for summer use, 2-3.9 are suitable for three-season use, while values above 4 are suitable for winter use.

Fabrics

Polartec Alpha

Polartec® Alpha® active insulation continuously releases excess body heat before it builds to cause saturation and discomfort. This patented, adaptive knit quality is made possible through Alpha's lofted fibers connected to a solid mesh core. And since Polartec® Alpha® design is inherently hydrophobic, it resists all moisture and dries incredibly fast.

Advantages: Regulates warmth | Advanced breathability | Fast drying | Compressible | Lightweight | Highly durable

Polartec Power Air

Is a revolutionary, new knit construction that encapsulates air to retain warmth and reduce microfiber shedding. The end result is a high performance fabric with advanced thermal efficiency that sheds at least 5x less microfibers than modern synthetic fleece materials. And while all fabrics will shed fibers over time, Polartec® Power Air™ is a step forward in reducing the environmental impact of what we make and wear.

Pontetorto

The made in Italy fabric by Pontetorto is made from Perpetual recycled polyester yarns and ECONYL® a nylon fibre that is 100% regenerated from fishing nets and other nylon waste.

ECONYL®: Is a nylon fibre that is 100% regenerated from fishing nets and other nylon waste.

Perpetual has developed a unique, developmental technology to convert plastic bottles into high quality filament yarns.

Measures

Pole Extension

The pole, which is divided into 2 or 3 telescopic sections, can be adjusted to optimum height within the range of the extension piece.

Features

Lock & Go

Quick and effective locking using an outer lever mechanism to adjust pole length, even while wearing gloves.

According to the different models, each pole has a snow roller, roller or silent tip

Nordic Walking Fast Adjustment System

Rapid hand strap release system to free hands immediately in a single movement.

The end of the tip is extended and guarantees maximum grip on all types of terrain, as well as being excellent in releasing heel lifts for ski mountaineering or next-generation snowshoes.

B Batura

WINTER

Triangular
Shape

62 - 135 cm

600 g
per pair

78409 HCU

SPARE PART
INCLUDED:

Batura is a telescopic, tough pole for different purposes: winter trekking, snowshoeing, or ski mountaineering.

Main features: Section material: 7075 aluminium alloy | Section diameter: 18/16/13 mm | Structure with triangular section: for better resistance to bending | Lock&Go lever in aluminium | Anatomic non-slip hand grip | Tungsten tip | Two baskets included: winter, for snow, and multi-purpose, for trekking | Silent tip

3 triangular, telescopic sections in 7075 aluminium alloy ϕ 18/16/13 mm | Anatomic, non-slip handgrip with extension covering a part of the first section | Tungsten tip | Aluminium lock & go lever THE TRIANGULAR SECTION of this pole gives it added flexibility compared to the traditional round section shape. This greater flexibility also means greater strength for the pole, which will be better able to withstand loads and stresses. According to laboratory tests, the flexural strength values of a pole with a triangular section and a diameter of 16/14/12 mm will be increased by 20 to 50% in the respective sections (top +20%, centre +35% and bottom +50%) compared to the same pole with a round section.

The Ferrino Warranty

Every Ferrino article is studied down to the smallest detail and made with the most suitable materials for its intended use. The strict "Ferrino Quality" controls guarantee a product free from defects in materials and packaging.

If these types of defects are found, you can use the warranty which is valid for 2 years from the time of purchase of the product.

For High Lab products, the warranty is valid for 3 years.

Please note: The warranty does not cover defects caused by improper use or due to normal wear and tear of the components following prolonged use. In the case of a product purchased from a Ferrino retailer, the purchaser must return the defective item to the point of sale where he/she made the purchase together with the receipt (condition of validity of the warranty). The retailer will inform the distributor or Ferrino directly of the claim.

Ferrino will, at its discretion, request the return of the product, replace it or repair it. If the defect turns out not to be covered by the warranty, Ferrino will propose a cost estimate including shipping costs.

In the case of a product purchased from our online shop, the item can be returned, in the event of a defect or problem, directly to the Ferrino after-sales service. To start the process, fill out the form on the page (<https://www.ferrino.it/chi-siamo/sostenibilita/riparazione-e-manutenzione.html>), our internal staff will then assess whether to repair or replace the product by examining the individual cases received.

For our customers who make purchases on online sites and who benefit from the two-year warranty, our first action is to identify the source of the purchase. Therefore, please request assistance directly from the online shop if it also has a physical shop or handles returns directly on the platform. If this is not possible, the case will be handled internally, proceeding with the return process in the workshop and maintaining direct contact with the customer to ensure a timely and satisfactory resolution.

This warranty does not limit the consumer's rights as defined by the laws in force in various countries.

Code of Conduct for Suppliers

For some time now, Ferrino has required its suppliers to underwrite a commitment to operate according to principles of mutual trust and absolute respect for human rights and protection of the working environment.

The company has recently re-launched a special programme to prevent the use of any labour under the age of 15, in compliance with the International Labour Organisation Convention no. 138.

Supplier selection

Ferrino carefully selects its suppliers and evaluates them on the basis of whether they meet the necessary technical, organizational, and safety requirements. Each Ferrino supplier is obliged to report and comply with the product quality plans that provide all the information and compliance and quality requirements requested.

Thanks to a constantly updated system of indicators and evaluations, a ranking is established for the selection of suppliers.

All suppliers are required to sign the Safety Plan, a document that sets out the safety requirements of all materials used, including compliance with REACH, the European regulation governing the use of chemicals in finished products. As we also want to ensure that our suppliers respect our corporate values, we give preference to those with high environmental and social standards, certified by internationally recognised bodies. To date, 96% of our purchases come from product suppliers with at least one certification.

If we consider the volume of purchases from certified product suppliers in the Ferrino product portfolio, we can see, in detail, that 56% of these have Environmental, Social, and Qualitative certifications, 22% have Social certifications, 15% have Environmental certifications, and 7% have only Qualitative certifications.

Another category of strategic suppliers are Value Brand Suppliers, indirect suppliers of high-quality raw materials and components that enable the production of a product with excellent technical performance.

For this category of suppliers too, it is essential that, in addition to their undisputed technical and quality characteristics, they guarantee high environmental and social standards. For this reason, 100% of the raw material suppliers we select have one or more environmental or social certifications.
