A BRIEF

OVERVIEW

OF OUR

HISTORY...

La Bavetta is a snail farm located in Ostiglia, within the verdant province of Mantua.

Our land snails are born, thrive, and reproduce within the enclosures of the farm, which is nestled among the verdant fields of sunflowers.

Here, the agricultural tradition thrives. Simone's passion originated on his grandfather's estate. We cultivate and harvest snails through entirely natural, sustainable, and cruelty-free methods, as we believe that honoring nature equates to honoring ourselves.

In addition to numerous minerals and vitamins, such as vitamin C and vitamin E, snail slime comprises:

COLLAGEN:

Naturally occurring in the skin, it diminishes over time, leading to increased dehydration and susceptibility to wrinkle formation. Snail mucin replenishes the collagen layer and provides a nourishing and toning effect on facial skin.

ELASTIN:

This protein maintains the skin's elasticity.

GLYCOLIC ACID:

It stimulates collagen production in the tissues and possesses exfoliating and purifying properties for the skin. Consequently, snail slime is highly effective not only in combating wrinkles but also in addressing impurities and acne.

ALLANTOIN:

Snail slime is abundant in this substance, which encourages cell regeneration and facilitates the removal of dead cells. The result is brighter, fresher, and firmer skin.
