

ITALIAN SPRING GRASS BIG BALES

SIZE	Big Bales 600 - 700 kg Tied with iron or plastic rope	
DIMENSIONS	Height: 80 cm Depth: 120 cm Length: 160 - 210 cm	
PRODUCT DESCRIPTION	First-cut forage is a mixture of grasses grown in alfalfa fields during the late winter season, when the alfalfa plant is dormant, or harvested from mixed permanent grassland.	
NUTRITIONAL PROPERTIES	Moisture: 10% max Protein: 13% max ADF: 40% - 45% NDF: 55% - 65% Ash: 10% max	These values, expressed on as-sampled basis, vary depending on the stage of maturity of the plant.
USAGE	First-cut forage is rich in highly digestible fibre, cellulose and sugar, making it particularly suitable for ruminant animals in the dry stage, or for monogastric animals such as horses.	
PLUSES	During processing, all SO.PR.E.D. products are dust-extracted and separated from foreign matter such as dirt, stones, plastic and metal.
