Oggetto: RE: Acceptance to the UCLA Anderson Global Access Program - Moving Box

Allegati: GAP 2012 MOU - Partners2.pdf

Dear Mr. Traverso:

Congratulations on your acceptance into the 2012 Global Access Program at the UCLA Anderson School of Management. We are pleased to offer you the opportunity to be a part of this year's program and look forward to working with you and your company in this unique and exciting activity. You will join over 400 emerging high technology ventures who have participated in this program over the past fourteen years.

Official acceptance into the program is contingent upon receipt of the signed Company Memo of Understanding (attached) due on or before June 11, 2012.

In June 2012, we will assign a team of Fully Employed Anderson MBA students to work directly with your company. The students will officially start the program on June 23, and will introduce themselves to you via email on or before July 1.

By joining the program your company commits to send a minimum of two executive representatives to UCLA Anderson in Los Angeles for our major program events in July and December. The first is the Company Launch, which begins Thursday, July 19 with an evening reception and continues for two full-days on Friday, July 20 and Saturday, July 21. During these two all-day sessions, you will meet and work with the students on your team and develop a written set of objectives for the duration of the program. Your executives will also need to be present at UCLA Anderson for the Final Presentation to be held on Saturday, December 8, 2012 when your final strategic business plan will be presented to a panel of expert judges.

We also request that you send us your company presentation for the student website. This material can include but is not restricted to brochures, video clips, virtual models, or articles. You may email me your materials or if the files are too large you may create your own ftp site or send us an invitation via www.dropbox.com. If you choose the latter method, our email is gap.fieldstudy@anderson.ucla.edu.

We have assembled the following [website](#) for your convenience. This is where we will post program information, key dates, and upcoming event details. We also ask that you register your attendees for the July and December events on this site at later dates.

On behalf of GAP, we look forward to your participation in this year's program.

Best Regards,
Michelle

>> A COMPREHENSIVE OVERVIEW

The Global Access Program (GAP) pairs organizations around the world with a team of professional MBA candidates from the UCLA Anderson School of Management – each in their final year of study. Over the last 14 years, 431 companies from 17 different countries have reaped the benefits of 2,250 GAP students' work. Students address strategic business issues to develop a comprehensive, independent business plan under the guidance of our distinguished faculty advisors.

BENEFITS TO YOUR COMPANY

- A comprehensive, independent assessment of your current business plans and corporate growth strategies
- Primary market research with over 100 direct contacts, as well as extensive secondary market research
- Access to UCLA Anderson's extensive business network of faculty, consultants, investment professionals and 37,000 alumni around the world
- Evaluation using state-of-the-art management frameworks and analysis techniques
- An investment-quality, professional business plan with full financial projections
- Solid recommendations to accelerate your company's growth to the next stage of development
- Final 15 minute formal plan presentation to three outside professional judges including attorneys, accountants, technology experts, angel investors and venture capital professionals
- A 35 minute video of the final presentation including a 20 minute Q&A session with judges

GLOBAL ACCESS PROGRAM

UCLAAnderson
School of Management

HOW IT WORKS

As one of the top business schools in the world, and the #1 part-time MBA program in the nation (BusinessWeek, 2007), the UCLA Anderson School of Management attracts some of the most accomplished and talented individuals – bar none. These students are full-time professionals with at least 9 years' experience and possess a great range of expertise, including marketing, finance, and operations. Drawing from this base, the Global Access Program matches your company with a team of five FEMBA students. This team will collectively contribute more than 2,500 hours to your company project (most firms find this cost-prohibitive at typical consultant rates).

The business plan focuses on one or more of the following:

- Launching a new product into an existing market
- Launching an existing product into a new geographical market
- Offering an existing product into a new market segment
- Leveraging existing or new products into new markets

Finally, the business plan incorporates financial, marketing, operational and strategic recommendations based on an extensive analysis of primary and secondary market research. The plan includes comparison and analysis of your company's value proposition to others in your competitive environment.

INVESTMENT REQUIREMENTS

- Top management's time for meetings with students
- Top management's participation and attendance at events on July 19-21, 2012 and December 8, 2012
- Full access to strategic and financial data
- Positive or near-positive cash flow to continue operations beyond December 2012
- Host students at their company headquarters
- Payment of \$15,000 program fee (up to \$12,000 is available for market research travel)

OUR CURRENT GAP PARTNER LOCATIONS

Australia, Korea, Brazil, New Zealand, Chile, Singapore, China, Spain, Finland, United Kingdom, Israel, U.S.A., Italy

IS YOUR COMPANY ELIGIBLE?

GAP-qualified companies are one of the following:

- A technology-based product or service company with emphasis in high technology*
- Independent business or a business unit within a larger corporation
- U.S. or foreign-based company who wants to sell outside their home country
- Entrepreneurial company with a track record and current revenues for a product/service

In addition to meeting our Investment Requirements (above), GAP-qualified companies also have:

- A project requiring business or strategic plan development
- Fluency in English at the senior management level
- Senior executives with business experience
- Customer validation of products or services

*GAP defines "technology" broadly as the practical application of science to industrial or commercial objectives. High technology involves highly advanced or specialized systems or devices where technology is an important major component, core competence, critical success factor and/or a key differentiator.

ASSURANCE OF CONFIDENTIALITY

The FEMBA-GAP program stringently maintains strict confidentiality standards regarding each field study project. All students, faculty, staff and company executives must sign a program non-disclosure agreement in order to participate. Over the course of 14 years and 431 successful projects, we are not aware of any breach in confidentiality.

Ufficio Economato e Automezzi di Stato*

Spett.le Moving Box S.r.l.
Corso Italia, 3
MILANO

La presente per ringraziare la Società Moving Box Srl per averci permesso, con un Progetto innovativo, di ammodernare le strutture di archivio già esistenti, applicando un'avanzata tecnologia low budget denominata Plug & Move.

Tale tecnologia ha, infatti, consentito di adeguare gli archivi su binari alle normative di sicurezza vigenti D.Lgs 81/2008, senza doverli sostituire, ovviando così ai rischi cui l'operatore può rimanere esposto utilizzando il compattato tradizionale a "movimentazione manuale".

L'automatizzazione ha permesso, inoltre, di velocizzare le operazioni di ricerca e consultazione, dando un sostanziale contributo in termini di tempi di lavoro e riqualificazione del personale, nonché l'eliminazione della criticità legata alla memoria storica degli operatori addetti all'archivio (spesso gli unici in grado di rintracciare documenti).

Ci dichiariamo pertanto pienamente soddisfatti del lavoro eseguito dalle maestranze che hanno svolto le operazioni di installazione con professionalità ed efficienza.

Per quanto sopra dichiarato esprimiamo alla Società Moving Box il nostro più sincero apprezzamento.

Milano, 9 aprile 2023

L'Avvocato Generale
Laura Bertolè Viale

Moving box

STATE'S ATTORNEY OF MILAN

With the present letter, we wish to thank the company Moving Box S.r.l. for having made it possible, with an innovative project, to retrofit our existing archive equipments, applying an innovative technology LOW BUDGET called Plug & Move.

This technology, in effect, allowed our shelving units on rails to become compliant to the safety and health requirements, without any replacement. In this way we prevent all the risks which operators are exposed to when they employ the traditional compactable mobile shelving units with "manual movement".

Moreover, the automation made the operations of documents search and consultation even faster, positively contributing in timing of work and requalification of the staff. We have also eliminated the critical situation of the historical memory of our operators (frequently the only ones able to find documents).

Therefore, we declare ourselves completely satisfied for the job carried out by the Moving Box's technicians, who worked with competence and efficiency.

For what we have just declared, we express to Moving Box our sincere gratitude and appreciation.

General Lawer
Laura Bertolé Viale

Prot. 03/2023/AG/MI

Rif.

CLASSIFICA:

PRIORITA':

ATTIVITA' SVOLTA DALLA SOCIETA' MOVING BOX SRL NELLA RIMODULAZIONE TECNOLOGICA DELLA STRUTTURA GESTIONALE DELL'ARCHIVIO GENERALE DEL TRIBUNALE DI MILANO.

Da circa un anno la Società MOVING BOX, si è resa disponibile a studiare l'ambizioso progetto di rimodulare la conservativa concezione gestionale di un delicato ufficio pubblico qual è il nostro. Gli impianti di archiviazione sono infatti obsoleti e la carenza di fondi ne impedisce la sostituzione. La Società MOVING BOX ci ha presentato un progetto su nostra richiesta che ci ha consentito di utilizzare le strutture esistenti, applicando alle stesse una tecnologia a basso costo ma altamente innovativa in quanto capace di automatizzare i nostri impianti.

E' nata così una sperimentazione LOW COST sul campo che, sfruttando a costo zero le tradizionali strutture di archiviazione costituite da armadi compattati con movimentazione manuale a volantino, ha permesso l'applicazione di un automatismo, detto **PLUG & MOVE** che consente la gestione automatizzata degli impianti.

PLUG & MOVE ha risposto pienamente a quelle che erano e che continuano ad essere le condizioni preliminari del progetto, condizionate dalle limitate risorse finanziarie a disposizione e dalla esigenza di recuperare le infrastrutture esistenti.

PLUG & MOVE è in grado di dialogare con sistemi master di controllo che lo rendono intelligente e hanno permesso la:

1. Mappatura dell'archivio
2. Apertura con password personalizzate
3. Lettura dei tag con rintracciabilità delle pratiche
4. Gestione automatica dei registri di passaggio
5. Memoria delle pratiche in giacenza presso l'archivio o in giacenza presso altri uffici
6. Memoria e autorizzazioni degli operatori d'archivio
7. Possibilità per il responsabile di controllo e visione di tutte le attività

I vantaggi che ne derivano sono estremamente importanti:

1. Ridottissimi costi di installazione e manutenzione
2. Sicurezza dell'operatore
3. Automazione low cost

Siamo pertanto estremamente soddisfatti della eccellenza offerta dalla società MOVING BOX in termini di professionalità, di risorse umane e di alta tecnologia, non riscontrabile in altre aziende, a memoria trentennale di questo Responsabile. E da parte del medesimo va il più vivo apprezzamento a questa Società ed il più sincero ringraziamento per il consistente apporto fornito all'Archivio giudiziario, tra l'altro certificato il più grande d'Europa, con i suoi 12 milioni di fascicoli distribuiti su 10.000 metri quadrati.

IL RESPONSABILE DELL'ARCHIVIO GENERALE
IL FUNZIONARIO
Umberto Valloreja

Milan Trial court General archive

Milan, 14th March 2023

WHAT THE COMPANY MOVING BOX SRL HAS MADE TO IMPROVE THE
ADMINISTRATION OF THE GENERAL ARCHIVE OF THE MILAN TRIAL COURT.

MOVING BOX SRL started almost a year ago to study how to innovate the the administration of a public studio such as the Milan trial court is. Our existing mobile shelving system was outdated and no funds were available to replace them. The company MOVING BOX SRL presented us a project that allowed us to continue using the existing structures and to put on them a new technology low cost but innovative, which is able to automate our equipment.

A low cost field testing has been created by exploiting **for free** the existing shelving equipment and putting on them an automatism called **PLUG & MOVE**.

PLUG & MOVE answered completely to our need because it made possible to modernise the system with limited financial resources and to recover the existing structures.

PLUG & MOVE permitted:

1. Mapping the archive.
2. Opening with personal password.
3. Tracking down files with a tag.
4. Handling automatically recorder books.
5. Memorising files stocked in the archive or in other offices.
6. Memorising and authorising operators in the archive.
7. Checking all the activities.

The **advantages** deriving from its use are very important:

1. Low cost services of installation and maintenance.
2. Operator safety.
3. Low cost automation.

We are extremely satisfied of the supply that the company MOVING BOX gave us. In my whole carrier in this archive, which lasts 30 years, no other company gave us so much professionalism, human resources and high technology such as this company. I want to thank and to appreciate the company for the constant contribution that they gave us in the General archive, which is the largest in whole Europe, with 12million briefs in 10.000 squared meters.

The person in charge of the General archive.
Umberto Valloreja
