

BUSINESS PRESENTATION

TECNOLOGIE ASSISTIVE S.r.l. markets technological and orthopedic aids to improve autonomy in mobility, communication, learning and to better address the sensory problems of people with disabilities and the elderly.

The proposed aids are:

- Communication aids (communicators and specific software)
- Hardware dedicated to cognitive and motor problems (special keyboards, mouse emulators, eye pointing systems, ergonomics and postural systems, sensors)
- Aids for daily autonomy (for motor, cognitive and sensory problems)
- Products and services for home automation and environmental control
- Compensatory, rehabilitative and games software accessible
- Hardware and software for low vision problems (Braille devices, speech synthesizers, video magnifiers, screen readers, mobile phones)
- Aids for hearing loss and deafness (aids for daily life and for communication)
- Aids for the elderly and motor disabled.

The company is also active in the sector of health supplies for clinics, rehabilitation centers and facilities for the elderly and disabled, hotels and facilities open to the public, setting up physiotherapy and occupational therapy gyms, speech therapy centers, medical and dental offices, hospital departments, medical shops, instrumental therapy centers, operating theaters, etc. with a wide range of products.

Operating since 2013, and with decades of experience in the sector, the company boasts the collaboration with the most important realities of the Italian market and the international scene, as well as having partnership relationships with the major research and development centers and the most important associations of the world of disability.

It is one of the very few Italian companies that collaborates with various universities and specialized centers.

The company is also active in the training sector of health and school workers, and carries out research activities for new products to offer to its customers, also through collaboration with Aid Centers and carries out suitability tests of the various devices on patients suffering from various pathologies.

Tecnologie Assistive S.r.l. is a member of ASSO AUSILI, the national association of companies producing and distributing electronic and IT aids and DAT Europe – European Industry Association for Digital Assistive Technology.
