mollificio renzo scotti

s.r.l.

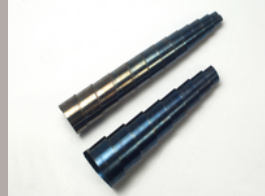

Torsion springs

Production of single or double torsion springs, with automatic bending of any type of shank.

Volute springs

Production of volute springs, made of hardened-steel band for vineyard shears and garden secateurs, poultry shears and clippers. Sizes: from 40 mm to 100 mm. Finish: blue, nickel plated and chrome plated.

Metal fittings

Springs made from of hardened or hardenable steel band and strip, stainless steel and other materials for a wide range of applications.

Wireforms

Springs coiled from wire, automatically bent and shaped, custom manufactured according to the specific usage required.

PRODUCTS

Disc springs

Production of disc springs in accordance with norm DIN 2093, as well as springs made according to customers' specifications and drawings

Compression springs

Production of compression springs with cylindrical, conical and biconical spiral. Coiled from round, square and rectangular wire. Electronic size check.

Extension springs

Production of single and double loop extension springs, with English or German hooks, extended and expanded.

Oil&Gas Industry

Production of all types of springs used in the oil and gas sector: compression, extension, torsion and double torsion and disc springs, square-section sealing rings and leaf springs, all manufactured using super alloys

MATERIALS:

The materials used by our company include: **carbon steel**, **alloy steels** and **pre-hardened steels** (CrSi, CrV, SiCrNi), various types of **stainless steel**, **phosphor bronze**, **beryllium brass** and **beryllium copper**.

Special materials

Inconel

Nimonic 90

Inconel 718

PH Steel

Inconel X750

Titanium Beta C

Inconel 625

Elgiloy

Monel 400
