

OSSOLA

ELECTRICAL PANELS

We design and manufacture customized electrical panels tailored to your needs

Ossola Impianti is proud to present its new division dedicated to electrical panels, specializing in the design, production, and distribution of bespoke solutions. Each panel is designed to meet the specific needs of industrial facilities, with quick delivery times and quality that meets the highest standards of reliability.

Our production area is equipped with state-of-the-art tools for testing and certifying products in compliance with the CEI EN60439-1 standard.

Who We Are and Our Mission

As a multi-service company, Ossola Impianti has always aimed to provide innovative and high-quality solutions. The new division for electrical panels is committed to creating customized products, designed with meticulous attention to detail and in full compliance with current regulations. Thanks to a qualified team and advanced technologies, we guarantee fast delivery times and continuous support for our clients.

What We Offer for Industrial Systems

Customized Electrical Panels

We design and manufacture tailor-made electrical panels to optimize energy distribution and ensure the safe and reliable operation of your systems.

Panels for Photovoltaic Systems

Our experience in the photovoltaic sector allows us to offer panels designed to maximize energy efficiency and the sustainability of your installations.

Types of Electrical Panels

Panels for Industrial Systems

Power Center: Designed for primary energy distribution, they provide robustness, safety, and high performance, even under heavy load conditions.

Motor Control Center (MCC): Allows centralized motor control and protection, with options for removable units for quick and safe maintenance.

Power Center Panel

MCC Panel

Electrical Panels for Photovoltaic Systems

Interface Panels: Essential for grid-connected systems, they ensure regulatory compliance and safety.

Field Panels: Optimize energy distribution and protect against overloads, improving system performance.

Unicobox AC/DC: Combines protection, switching, and monitoring functions in a compact, easy-to-install unit.

Off-Grid Panels: Essential for stand-alone photovoltaic systems, managing the energy produced and stored, ensuring efficiency even without a grid connection.

Meter Panels: Monitor and account for the energy produced or consumed, providing transparent and precise data for optimal management.

Why Choose Ossola Impianti

Customization: Every project is unique, just like the needs of our clients.

Certified Quality: All electrical panels are designed and certified according to the strictest standards.

Fast Delivery: We guarantee delivery within just a few working days.

Sustainability: Our solutions focus on energy efficiency and environmental respect.

With Ossola Impianti, you have a reliable, innovative partner ready to meet all your needs.
