

WELLBACK SYSTEM

COMPANY PROFILE

WBS Medical Wellness | Dynamic Traction and Stretching
WBS Lift | WBS Vision Pull Back | WBS Group

About Us.

Innovating well-being.

Building the future of movement.

Since 2014, WellBack System has been committed to revolutionizing postural well-being, rehabilitation, and rehabilitative fitness by creating cutting-edge solutions that combine technology, scientific research, and specialized training.

VISION

To design smart devices and educational programs to help therapists, trainers, and specialized centers provide personalized wellness treatments and programs with tangible results.

MISSION

Our mission is to redefine the standards of postural rehabilitation and fitness, making musculoskeletal health a concrete, accessible, and lasting goal for everyone.

Physiotherapy and Fitness as steps of a single journey: **Medical Wellness.**

WellBack System believes in an integrated approach, where the rehabilitative phase naturally merges with functional enhancement, postural improvement, and long-term maintenance.

WBS supports people suffering from back, neck, or knee issues or postural imbalances, starting from the acute pain phase.

Our WBS benches are designed to support every phase of the journey:

- 01 Acute phase treatment**
- 02 Progressive functional recovery**
- 03 Maintenance and physical performance**

WBS is not just a support tool: it's an integrated platform that transforms each treatment into a structured, effective, and highly professional experience.

One device. Endless possibilities.

With WBS, each center can expand its offering by integrating diverse yet synergistic activities.

- 01 Dynamic decompensated postural activity
- 02 Manual therapy
- 03 Medical Pilates
- 04 Dynamic traction
- 05 Muscle strengthening

The multifunctionality of the devices allows them to adapt to every phase of the therapeutic and functional process, from rehabilitation to maintenance — all with a single tool.

**WBS is the bridge between rehabilitation and fitness,
creating new growth opportunities.**

A new standard for spinal health.

WBS devices represent a breakthrough in postural therapy, thanks to the integration of a dynamic traction system and the application of dynamic decompensated stretching.

These techniques promote rapid pain relief and significant improvements in mobility.

Dynamic Traction: beyond static decompression.

Motorized traction with WBS combines with the movement of the platforms, offering innovative dynamic traction protocols that adapt in real time to the patient's needs. The adjustable angles and motorized control allow for progressive and controlled traction.

The effectiveness of dynamic decompensated stretching.

Motorized angle adjustments allow for dynamic stretching of muscle chains without unwanted compensation. The synchronized and controlled movement ensures a safe, personalized, and effective therapeutic experience.

WBS Lift.

The complete device for manual therapy, traction, and therapeutic exercise.

WBS Lift is perfect for therapists seeking a complete, advanced, and intuitive device. It's a multifunctional motorized table with integrated dynamic decompensated traction, allowing various activities in one place without needing to move the patient.

Thanks to micrometric height adjustment and automated movements, it ensures maximum comfort and safety for all treatments, without the need to move the patient from one device to another.

TREATMENT TABLE

With a height adjustable from 47 to 98 cm, it is the ideal solution for every patient and therapeutic treatment type.

MULTIFUNCTION SOLUTION

Complete treatments in a single device: manual therapy, dynamic traction, active exercise and Medical Pilates.

EASY, SAFE AND ACCESSIBLE

Designed to offer maximum comfort and safety, even for patients with motor limitations.

WIRELESS CONTROL

Integrated technology for automated and trackable sessions: data logging, progress tracking, and video tutorials.

WBS Vision Pull Back.

Posture, traction, and movement — all in one compact device.

WBS Vision Pull Back is a versatile postural device designed for effective, personalized sessions. Thanks to dynamic traction and decompensated stretching, it's a complete tool for therapy, personal training, Medical Pilates and postural work.

The integrated elastic bands and the WBS Vision Program software complete this multifunctional, easy-to-use system for all professionals.

EASY, SAFE AND ACCESSIBLE

Chair-height with ergonomic design: comfortable for users with mobility challenges and for practitioners.

DYNAMIC TRACTION

Decompensated stretching system for customized treatment of neck pain, lower back pain, and joint overloads.

MULTIFUNCTION DEVICE

Postural, strengthening, and Medical Pilates exercises adaptable for both therapeutic and personal training sessions.

WIRELESS CONTROL

Technology for easy and repeatable sessions: data logging, video tutorials, and cloud-based session management.

WBS Group.

The compact, versatile solution for group training.

WBS Group maximizes the potential of group and activities work, offering guided, effective, and accessible experiences for every users, regardless of their age and level of training.

WBS classes are based on at least 5 synchronized benches: a collective, high-impact experience that still allows personalized work for each participant.

SYNCHRONIZED MOVEMENT

All benches move simultaneously and automatically via a single device, with no effort for the trainer.

ACTIVITY FOR EVERYONE

WBS classes are accessible to users of all ages and experience levels, thanks to the stable structure and chair-height design.

EASY TO TEACH

Standardized protocols enable even less experienced trainers to lead effective, consistent, and easily repeatable sessions.

EFFICIENCY WITH MINIMUM EFFORT

One trainer leads the group with full control, optimizing time, space, and operational impact.

**With WellBack
System, evolve
your practice.**
