1976 

COMPANY PRESENTATION

THE FIRST ESTABLISHED EYEWEAR COMPANY IN SOUTHERN ITALY

Since 1976

Competence, experience, high quality raw materials strictly produced in Italy by leading companies, these are the elements which allow to create a top quality pair of glasses using acetate sheets and core wires.

These elements alone would not have been enough for the success of a high-quality product, if experienced craft professionals like the owners weren't around. People driven by passion and capable to put the production process in motion, a 40 stages process, all carried out in the company laboratories.

Over the years, the company has renewed the processing machinery several times, always having a basic tenet: automation always supplied with the substantial contribution of master craftsmen.

It is from this fusion that each pair of glasses created becomes a unique and exclusive piece for the wearer.

AVERAGE TIME OF
DELIVERY

FDA Authorization for Export to the USA

We have FDA authorization to export our products to the United States. This certification attests to compliance with the highest safety standards, opening doors to a significant presence in the American market.

Fast Delivery Times

We understand the importance of prompt delivery in today's fast-paced world. That's why we have optimized our production processes to ensure swift turnaround times. On average, our delivery times are among the fastest in the industry, with orders typically fulfilled within 90 days. Our efficient logistics and dedication to customer satisfaction make us a reliable partner for all your eyewear needs.

Made in Italy

We take pride in our Italian heritage. Every pair of glasses is a testament to the unparalleled craftsmanship and attention to detail that define Italian manufacturing. From the initial design to the final touches, all processes are meticulously executed on Italian soil, showcasing the essence of Italian excellence.

COMMITMENT TO SUSTAINABILITY

We are deeply committed to minimizing our environmental footprint and promoting sustainability at every step of our production process.

Moreover, we have implemented eco-conscious practices throughout our operations, opting for low-impact manufacturing processes that minimize resource consumption and waste generation. From water recycling to energy-efficient machinery, we continuously seek innovative solutions to reduce our environmental impact.

In line with our commitment to renewable energy, we are pleased to announce that 70% of the energy we use is generated from renewable sources. By harnessing the power of solar we are reducing our reliance on fossil fuels and mitigating our carbon emissions.

In addition to sustainable production practices, we prioritize eco-friendly transportation methods. Our company fleet consists entirely of electric vehicles, reducing our carbon footprint and contributing to cleaner air in our communities.

Wherever possible, we prioritize the use of eco-friendly and sustainable materials (i.e. Mazzucchelli M49 or Acetate Renew, L'AVES BioCell) ensuring that our eyewear not only looks good but also contributes positively to the planet.

We also strive to work with suppliers who have sustainability certifications such as EMAS (Eco-Management and Audit Scheme), further emphasizing our dedication to responsible sourcing and production practices.

While we are not yet entirely plastic-free, we have initiated the process to become so. By eliminating plastic from more than half of our production processes and completely from our workspaces we are taking a proactive stance in the fight against environmental degradation.

For us sustainability is not just a buzzword; it's a fundamental principle that guides everything we do. We believe that by embracing sustainable practices today, we can create a brighter and more sustainable future for generations to come.
