ENVIRONMENT

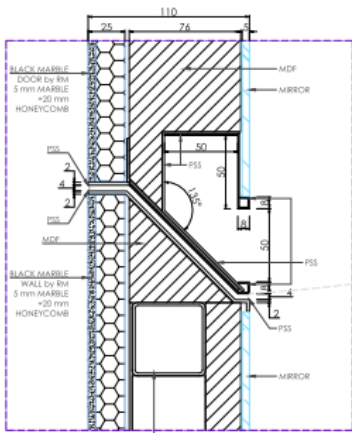

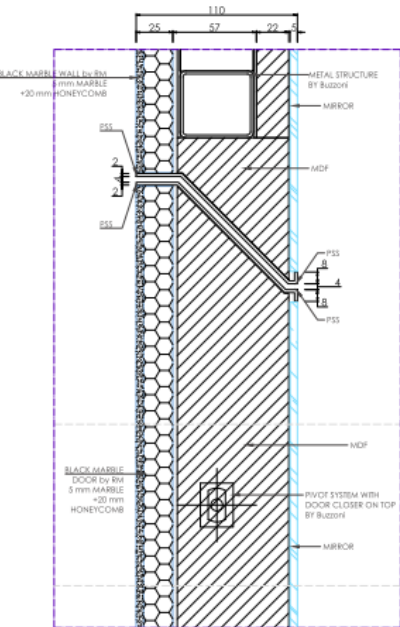

- 🌳 We are FSC and PEFC certified
- 🌳 We have calculated our greenhouse gas emissions and we are committed to reduce them
- 🌳 We are ISO 14001 certified
- 🌳 We made the product mapping assesment for LEED purposes
- 🌳 We achieved the bronze medal released by Ecovadis, one of the world's largest and most trusted provider of business sustainability ratings.

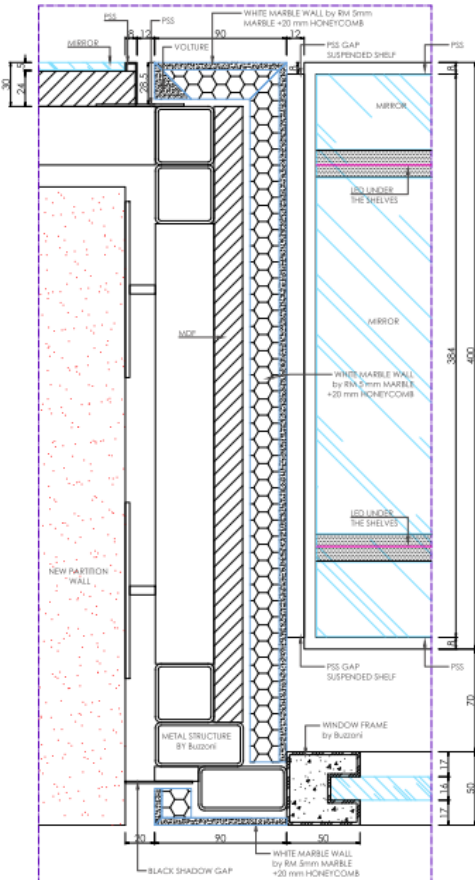

A wide-angle photograph of a large industrial wood processing facility. In the center, a worker in a white shirt and khaki pants stands with his back to the camera, looking at a computer monitor on a machine. To the left, another worker is partially visible near a large blue and white machine labeled 'Venture 2105 HOMAG'. To the right, a third worker is handling a large sheet of wood. The floor is covered with stacks of processed wood planks. A large, flexible white dust extraction hose hangs from the ceiling. The background features a long wall with a series of large, rectangular windows that let in bright natural light.

We use solid modelling techniques; our softwares are integrated with CNC machinery. This cutting-edge design system reduces the risk of errors as issues are highlighted during this early phase.
