A company born from the depths of Irpinia

A company born from the depths of Irpinia

In Tabula is a company born in Irpinia, a territory in the inland areas of Campania, extremely generous and rich from an enogastronomic point of view.

This business was started by three young people Irpini, Rocco, Luigi and Angelo, **who love their territory and know it like few others.** Their determination has given life to a unique model of valorization of Irpinia food and wine products.

These productions represent true **excellence** known and established in many countries around the world, **whose nutritional and sensorial qualities are unique**, which is why they manage to reach the most qualified markets.

In
Tabula

Immersion in the scents and flavours of Irpinia

In Tabula's activity is aimed at enhancing and **promoting these references**, going well beyond mere marketing.

Each of these products requires the right interpretation to be enhanced, transforming simple consumption into **a true immersion in the aromas and flavors of Irpinia**.

For this reason, it was decided to focus on **partner restaurateurs located in different countries of the world who believe in the value and potential of the products that Irpinia** has always offered.

A rigorous selection process
An impeccable logistical organization
The professionalism of the restaurateurs involved
The sensitivity of people who love good food

These values represent In Tabula's Recipe to help all those interested in experiencing the Irpinia food and wine experience to the fullest.

Winter

Shop easily with our APP

The platform will allow end users to find and possibly have typical food products delivered, within a given kilometer radius of their physical location, via geolocation.

The products will be available in selected restaurants that will purchase them directly from In Tabula, which will then take care of loading them in the restaurateur's

"warehouse", so as to make them visible to users who are within useful radius.

End users purchase the product, paying directly to the restaurant owner via the app, who will then provide almost immediate delivery (using their own means or external delivery services e.g. Glovo, Deliveroo, etc...).

WebApp for Restaurateurs and Distributors

The WebApp for restaurateurs and distributors is the software, functioning via online web browser on the cloud, that will be used by restaurateurs and distributors for whom IN TABULA has activated the account. It will include the following features:

Dashboard/Initial dashboard

- Order chart
- Customer Chart
- Orders to be fulfilled

Associated Customers Section

- List of users who have ordered at least once
- Rectification of associated customer data
- Associated customer order history

Orders Section

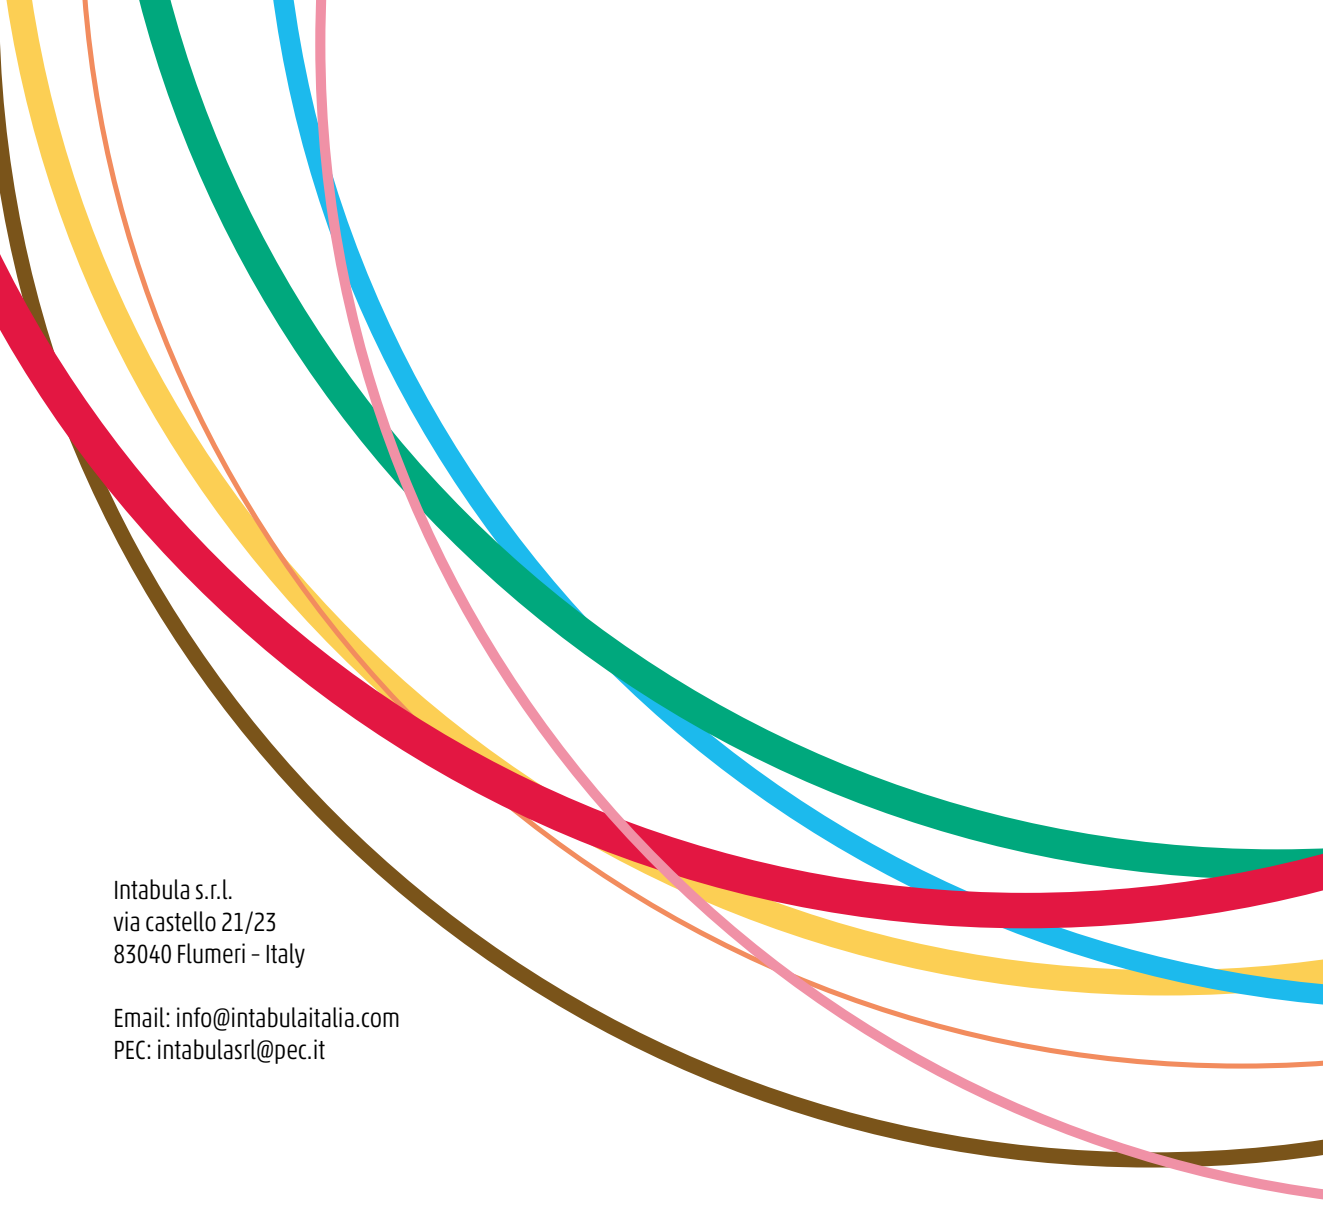

- List of orders received by the restaurateur or distributor
- Single Order View
- Change Order Status

Warehouse Section

- List of Uploaded Products
- Loading/Unloading History

Statistics Section

- Top Active Users
- Best selling products

An abstract graphic consisting of several thick, curved lines in various colors (yellow, orange, green, blue, pink, red, brown) that sweep across the page from the top left towards the bottom right, creating a sense of movement and depth.
